

## Program Data

### *Social Security*

The Social Security program—Old-Age, Survivors, and Disability Insurance (OASDI)—provides monthly benefits to workers and their families when the worker retires, dies, or becomes disabled. The amount of the worker's retirement insurance (old-age) or disability benefit is based on the worker's level of earnings in employment or self-employment covered by the Social Security program. Monthly benefits are payable to retired workers at age 62 (with reduced benefits) or to disabled workers at any age. The benefit amount for an auxiliary or survivor beneficiary is based on a percentage of the worker's benefit. Auxiliary and survivor beneficiaries must generally meet an age, disability, or child care requirement.

This number included 29,547,530 retired workers, 4,898,040 widows and widowers, 5,867,460 disabled workers, 2,773,630 wives and husbands, and 3,966,480 children. Social Security beneficiaries represented 15.8 percent of the total population and 90.8 percent of the population aged 65 or older.
