LETTER OF TRANSMITTAL

BOARD OF TRUSTEES OF THE
FEDERAL OLD-AGE AND SURVIVORS INSURANCE
AND DISABILITY INSURANCE TRUST FUNDS,
Washington, D.C., March 25, 1968.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D.C.

SIR: We have the honor to transmit to you the 1968 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund (the 28th such report), in compliance with the provisions of section 201(c) of the Social Security Act, as amended.

Respectfully,

HENRY H. FOWLER,
*Secretary of the Treasury and
Managing Trustee of the Trust Funds.*

W. WILLARD WIRTZ,
Secretary of Labor.

WILBUR J. COHEN,
Acting Secretary of Health, Education, and Welfare.

ROBERT M. BALL,
*Commissioner of Social Security
and Secretary, Board of Trustees.*

THE 1968 ANNUAL REPORT OF THE BOARD OF TRUSTEES OF THE FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND AND THE FEDERAL DISABILITY INSURANCE TRUST FUND

THE BOARD OF TRUSTEES

The Federal old-age and survivors insurance trust fund, established on January 1, 1940, and the Federal disability insurance trust fund, established on August 1, 1956, are held by the Board of Trustees under the authority of section 201(c) of the Social Security Act, as amended. The Board is comprised of three members who serve in an ex officio capacity. The members of the Board are the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health, Education, and Welfare. The Secretary of the Treasury is designated by law as the managing trustee. The Commissioner of Social Security is secretary of the Board.

FISCAL YEAR HIGHLIGHTS

Both benefit payments and contributions for the old-age and survivors insurance trust fund and the disability insurance trust fund continued to rise during fiscal year 1967, reaching higher levels in that year than in any previous year. The number of persons receiving monthly benefits under the old-age, survivors, and disability insurance program increased to 23.2 million by the end of June 1967. There were an estimated 85 million workers who had earnings in calendar year 1966 that were taxable and creditable toward benefits under the program, another record high.

For the old-age and survivors insurance trust fund, contributions in fiscal year 1967 amounted to \$22,567 million and were significantly larger—26 percent—than in the previous fiscal year, reflecting the impact of the provisions in the 1965 amendments which became effective on January 1, 1966 and (1) increased from \$4,800 to \$6,600 the amount of annual earnings taxable and creditable toward benefits and (2) increased the contribution rates for employees and employers, from 3.625 percent of taxable earnings to 3.85 percent each, and for the self-employed, from 5.4 to 5.8 percent. Other factors which contributed to the growth in contributions were (1) increases in the contribution rates, effective January 1, 1967, (2) the payment of estimated contributions on a quarterly basis by certain nonfarm self-employed persons, effective for taxable years beginning after December 31, 1966, and (3) the high level of employment and taxable earnings.

Total receipts of the old-age and survivors insurance trust fund amounted to \$23,371 million in fiscal year 1967. In addition to con-

tributions, receipts consisted of \$726 million in interest and profit on investments and \$78 million reimbursed from the general fund of the Treasury for the costs of benefits based on noncontributory credits for military service.

Total disbursements from the old-age and survivors insurance trust fund in fiscal year 1967 amounted to \$19,728 million. Of this amount, \$18,886 million was paid out for benefits, an increase of about 4½ percent over benefit payments in fiscal year 1966. Part of this increase resulted from the provision of benefits, effective for October 1966, for certain noninsured persons aged 72 and over under an amendment to the Social Security Act that was included in the Tax Adjustment Act of 1966, approved March 15, 1966. The provisions governing the financing of these benefits are described in appendix II.

The remaining disbursements consisted of \$508 million transferred to the railroad retirement account under the financial interchange provisions, \$334 million for administrative expenses, and \$88,000 for the cost of vocational rehabilitation services furnished to disabled adults receiving benefits from the old-age and survivors insurance trust fund on the basis of disabilities that have continued since childhood.

The excess of total income over total outgo, amounting to \$3,643 million, increased the total assets of the old-age and survivors insurance trust fund from \$19,872 million on June 30, 1966 to \$23,515 million on June 30, 1967.

The number of persons receiving monthly benefits from the old-age and survivors insurance trust fund at the end of the fiscal year was 21,148,000, about 7 percent more than at the beginning of the year. Some 14,881,000 of these persons were retired workers and their dependents, 5,538,000 were survivors of deceased workers, and 729,000 were noninsured persons aged 72 and over.

For the disability insurance trust fund, total receipts in fiscal year 1967 amounted to \$2,332 million. Of this amount, contributions amounted to \$2,249 million, nearly 45 percent more than in fiscal year 1966. This increase was partly due to the larger allocation of contributions to the disability insurance trust fund that went into effect on January 1, 1966, and was thus effective during all of fiscal year 1967. The remaining receipts consisted of \$67 million in interest and profit on investments and \$16 million reimbursed from the general fund of the Treasury for the costs of benefits based on noncontributory credits for military service.

Total disbursements from the disability insurance trust fund in fiscal year 1967 amounted to \$1,997 million. Benefit payments of \$1,861 million were about 8 percent higher than in the previous year. About \$31 million was transferred to the railroad retirement account. The remaining disbursements were composed of \$99 million for administrative expenses and \$7 million for the cost of vocational rehabilitation services furnished to disabled beneficiaries.

The excess of total income over total outgo, amounting to \$335 million, increased the total assets of the disability insurance trust fund from \$1,686 million on June 30, 1966 to \$2,022 million on June 30, 1967.

The number of disabled workers and their dependents receiving monthly benefits from the disability insurance trust fund increased to

2,060,000 by the end of fiscal year 1967, about 9 percent more than at the beginning of the year.

After the close of fiscal year 1967, Congress made extensive amendments to the Social Security Act and related sections of the Internal Revenue Code directly affecting the old-age, survivors, and disability insurance program. These amendments included an across-the-board increase in benefit amounts, benefits to certain new classes of beneficiaries, and a liberalization of the earnings test. The maximum amount of earnings taxable and creditable toward benefits was raised to \$7,800, beginning January 1968. The schedule of contribution rates for old-age, survivors, and disability insurance was revised to continue to reflect the intent of Congress that the program be self-supporting on a long-range basis. These and other provisions of the 1967 amendments are described more fully in another section of this report, and their effects are taken into account in the actuarial cost estimates presented in this report.

For the old-age and survivors insurance trust fund, estimates for the 5 fiscal years 1968-72 show that although both receipts and disbursements will increase steadily, the receipts will rise more rapidly, due to the increase in the maximum taxable earnings base in calendar year 1968 and to the scheduled rises in contribution rates in the law. Consequently, at the end of fiscal year 1972, this trust fund will amount to an estimated \$48.7 billion, or an increase of \$25.2 billion in the 5-year period. Receipts during fiscal year 1972 are estimated to total \$36.9 billion, and disbursements, \$27.8 billion.

Medium-range estimates, based on the assumption that economic activity will continue to expand throughout the period 1967-85, show continued increases in receipts, disbursements, and assets of the old-age and survivors insurance trust fund. According to these estimates, if the provisions of present law, as modified by the 1967 amendments, are assumed to remain unchanged, the assets of the trust fund will rise rapidly, reaching a total of \$316 billion at the end of calendar year 1985. On the other hand, if the maximum taxable earnings base and the benefit provisions of present law are assumed to be amended periodically so as to keep the program in line with changes in levels of average earnings, the assets of the trust fund will rise less rapidly, reaching a total of \$230 billion by 1985.

Long-range cost estimates for the old-age and survivors insurance program indicate that the program has a small positive actuarial balance. The level-cost of benefit payments and administrative expenses combined, estimated over a period of 75 years, ranges from 8.26 to 9.40 percent of taxable payroll. The intermediate-cost estimate is 8.77 percent of taxable payroll, as compared with the level-equivalent of the graded schedule of contribution rates that are allocated to this trust fund of 8.78 percent of taxable payroll.

According to estimates for the 5 fiscal years 1968-72, income of the disability insurance trust fund will rise more rapidly than disbursements because of the increases, effective in calendar year 1968, in the maximum taxable earnings base and in the contribution rate allocated to the fund. Consequently, this trust fund will amount to an estimated \$6.9 billion by the end of fiscal year 1972, an increase of \$4.8 billion in the 5-year period. According to the medium-range esti-

mates, the assets of the trust fund will reach \$32 billion by the end of calendar year 1985, if provisions of present law are assumed to remain unchanged. If, on the other hand, the maximum taxable earnings base and the benefit provisions of present law are amended periodically to keep pace with average earnings, the medium-range estimates indicate that the assets of the fund will reach \$20 billion by 1985.

Long-range estimates for the disability insurance trust fund show that the fund is in exact actuarial balance. Estimates of the level-cost, calculated over a 75-year period, range from 0.85 to 1.06 percent of taxable payroll. The intermediate-cost estimate is 0.95 percent of taxable payroll, the same as the level contribution rate that is allocated to this trust fund.

Two health insurance programs for persons aged 65 and over are related to the old-age, survivors, and disability insurance program: the hospital insurance program, which provides protection against the costs of hospital and related care, and the voluntary supplementary medical insurance program, which provides protection against the costs of certain medical and other health services (principally physicians' services). Each of these programs is financed through the operation of a separate trust fund. Summary descriptions of the provisions of, as well as statements of financial operations and actuarial cost estimates for, these two programs are contained in separate reports of the Boards of Trustees of the trust funds of these programs.

SOCIAL SECURITY AMENDMENTS OF 1967

The 1967 amendments to the Social Security Act and related sections of the Internal Revenue Code (Public Law 90-248, approved January 2, 1968) affect significantly both the immediate and long-range future levels of income and disbursements under the old-age, survivors, and disability insurance program. Benefit amounts were increased. Eligibility requirements for the payment of benefits were liberalized. Some modifications in the coverage provisions were made. The schedule of contribution rates was revised to continue to reflect the intent that the program be self-supporting.

The more important changes, significant from an actuarial standpoint, are presented below:

1. Larger benefits were made payable to future beneficiaries as well as to persons on the rolls:

(a) The maximum amount of earnings taxable and creditable toward benefits was raised to \$7,800 a year, beginning with 1968.

(b) Benefit amounts were increased by at least 13 percent, effective with benefits for February 1968. Except for certain beneficiaries aged 72 and over, the minimum primary insurance amount was increased from \$44 to \$55 per month. The maximum primary insurance amount of \$168 (based on average monthly earnings of \$550) that would have been payable under the law as in effect before the 1967 amendments was increased to \$189.90. For workers coming on the rolls in the future, benefits can be as high as \$218 per month, because of the higher earnings base. However, the maximum benefit of \$218, based on the maximum possible average monthly earnings of \$650, will not become generally payable for some years to come. The maximum family benefit

that will be payable on the basis of average monthly earnings of \$650 is \$434.40 per month.

(c) The minimum full-rate benefit for a family containing only one survivor beneficiary is \$55 per month (except in the case of a transitional insured widow aged 72 or over).

(d) The amount of the wife's or dependent husband's benefit is limited to a maximum of \$105 per month. This limitation does not affect anyone now on the rolls, and will not become generally effective until after a number of years.

(e) Effective February 1968, monthly benefits for transitional insured persons aged 72 and over were raised from \$35 to \$40 in the case of a worker or widow beneficiary, and from \$17.50 to \$20 in the case of a wife beneficiary.

(f) Effective February 1968, monthly benefits for transitional noninsured persons aged 72 and over were raised from \$35 to \$40 in the case of a single beneficiary, and from \$52.50 to \$60 in the case of a couple. As under prior law, all of these payments are made initially from the old-age and survivors insurance trust fund, with later reimbursement from the general fund of the Treasury for the costs of payments to those noninsured persons who have less than three quarters of coverage.

2. The conditions under which persons may become eligible for benefits were liberalized:

(a) Effective February 1968, a female worker who is fully insured at time of death, disability, or retirement is no longer required to be also currently insured at such time in order (i) for a child to be deemed dependent on her (and thus able to become entitled to monthly benefits without establishment of actual dependency), or (ii) for a dependent husband or widower to be able to become entitled to monthly benefits.

(b) Effective February 1968, reduced benefits were made payable to disabled widows (and disabled surviving divorced wives) at ages 50 to 59 and to dependent disabled widowers at ages 50 to 61. The benefit amount is reduced, according to the person's age at entitlement, ranging from the full-rate benefit of 82½ percent of the deceased spouse's primary insurance amount where entitlement begins at age 62, down to 71½ percent at age 60, and from there, scaling down to 50 percent where entitlement begins at age 50. The widow or widower must become totally disabled either before or within 7 years after the spouse's death or, in the case of a widowed mother, either before or within 7 years after the end of her entitlement to benefits as a mother. The test of disability for disabled widows and widowers is more restrictive than for disabled workers. Determinations of disability in the case of a widow or widower will be made solely on the level of severity of the impairment (without regard to such factors as age, education, and work experience, which are considered in disabled-worker cases). The disabling impairment must be of a level of severity sufficient to preclude an individual from engaging in "any gainful activity" (as distinguished from "substantial gainful activity").

(c) The insured-status requirements for eligibility for disability insurance benefits were liberalized for workers disabled before age 31 by providing an alternative to the provision requiring

that the disabled worker have at least 20 quarters of coverage out of the 40 calendar quarters preceding disablement. Under this alternative, if the disability occurs after attainment of age 24 and before age 31, then at least half the quarters in the period beginning with the calendar quarter following attainment of age 21 and ending with the calendar quarter in which the disability occurs must be quarters of coverage. (If the number of quarters in this period is an odd number, then it is reduced by one.) If the disability occurs before age 24, then at least six of the quarters in the 12-quarter period ending with the quarter in which the disability occurred must be quarters of coverage. The first month for which benefits were payable under this alternative provision was February 1968.

3. The earnings (retirement) test was amended, effective for taxable years ending after December 31, 1967. The provision for withholding benefits from beneficiaries under age 72 whose earnings exceed \$1,500 a year was changed so that benefits are withheld only when earnings exceed \$1,680 a year. Also, \$1 in benefits will be withheld for each \$2 of earnings between \$1,680 and \$2,880, rather than between \$1,500 and \$2,700 as under the law in effect before the 1967 amendments (\$1 in benefits will be withheld for each \$1 of earnings above \$2,880 instead of above \$2,700). The maximum amount of wages that a beneficiary may earn in a month and still receive all of his benefit for that month regardless of his annual earnings was raised from \$125 to \$140.

4. Effective for taxable years ending after December 31, 1967, the coverage basis of ministers was revised so as to cover clergymen except where the clergyman opts out on grounds of religious principle or conscience.

5. After December 31, 1967, the covered earnings of a person on active duty in the uniformed services (including active duty for training) are deemed to be \$300 more than his basic pay in a calendar quarter, except that the deemed additional covered earnings are \$100 when his basic pay in a calendar quarter is \$100 or less, and \$200 when his basic pay in a quarter is over \$100 but is not over \$200; the trust funds will be reimbursed from the general fund of the Treasury for the additional costs of paying the benefits resulting from these deemed additional earnings.

6. Changes relating to the financing of the old-age, survivors, and disability insurance program were made with the intent of assuring that it will continue to be self-supporting.

Under the new contribution rate schedule, the employee and employer rates each decreased from the 3.9 percent of taxable earnings applicable in 1967 to 3.8 percent as of January 1, 1968. (These decreases were exactly counterbalanced by increases in the contribution rate for hospital insurance.) In the future, increases are scheduled to occur in 1969, 1971, and 1973, when the ultimate rate of 5 percent is reached. There are corresponding changes in the self-employed contribution rate except that the ultimate rate of 7 percent in 1973 and thereafter has not been changed. Under the schedule as in effect before the 1967 amendments, the employee and employer rates would have increased in 1969 and in 1973, when an ultimate rate of 4.85 percent would have been reached.

The amendments increased the portion of the contribution rate allocated to finance benefits from the disability insurance trust fund. Effective January 1, 1968, the allocated rate was increased from 0.35 percent to 0.475 percent each for employees and employers. For the self-employed, the allocated rate was increased from 0.525 percent to 0.7125 percent.

Table 1 presents an estimate of the effect, expressed as level-costs in percent of taxable earnings, of the changes in the old-age, survivors, and disability insurance program that were made by the 1967 amendments.

TABLE 1.—CHANGES IN ESTIMATED LEVEL-COSTS AS PERCENT OF TAXABLE EARNINGS, BY TYPE OF CHANGE, INTERMEDIATE-COST ESTIMATE, 3.75 PERCENT INTEREST

Item	Old-age and survivors insurance	Disability insurance
Benefit cost of program in effect before 1967 amendments ¹	7.91	0.85
Effect of changes:		
Additional income, less additional benefits, resulting from higher earnings base.....	-.25	-.02
Increase in level of benefits.....	.95	.10
Reduced benefits for disabled widows and widowers at age 50.....	.03	
Liberalized disability insured status requirements under age 31.....		.02
Liberalized eligibility requirements with respect to dependents of women workers.....	.07	(?)
Liberalization of earnings (retirement) test.....	.06	(?)
Benefit cost after enactment of 1967 amendments ¹	8.77	.95
Level-equivalent of graded tax schedule before 1967 amendments ³	8.80	.70
Effect of changes in tax schedule.....	-.02	.25
Level-equivalent of graded tax schedule after enactment of 1967 amendments ³	8.78	.95

¹ Based on valuation date of Jan. 1, 1967. Taking into account (a) lower contribution rate on self-employment income and on tips, as compared with combined employer-employee rate; (b) administrative expenses, and (c) interest on trust funds on hand as of Dec. 31, 1966.

² Less than 0.005 percent.

³ Adjusted to reflect lower contribution rate on self-employment income and on tips, as compared with combined employer-employee rate.

NATURE OF THE TRUST FUNDS

The Federal old-age and survivors insurance trust fund was established on January 1, 1940, as a separate account in the U.S. Treasury to hold the amounts accumulated under the old-age and survivors insurance program. All the financial operations which relate to the system of old-age and survivors insurance are handled through this fund. The Social Security Amendments of 1956, which became law August 1, 1956, provided for the creation of the Federal disability insurance trust fund—a fund entirely separate from the old-age and survivors insurance trust fund—through which are handled all financial operations in connection with the system of monthly disability benefits payable to insured workers and to their dependents.

The major sources of receipts of these two funds are (1) amounts appropriated to each of them under permanent appropriation on the basis of contributions paid by workers and their employers, and by individuals with self-employment income, in work covered by the old-age, survivors, and disability insurance program and (2) amounts deposited in each of them representing contributions paid by workers employed by State and local governments and by such employers with respect to work covered by the program. All employees and their employers in employment covered by the program are required to pay

contributions with respect to the wages of individual workers (cash tips, covered as wages beginning in 1966 under the 1965 amendments, are an exception to this; employees pay contributions with respect to cash tips, but employers do not). All covered self-employed persons are required to pay contributions with respect to their self-employment income. In general, an individual's contributions are computed on annual wages or self-employment income, or both wages and self-employment income combined, up to a specified maximum annual amount with the contributions being determined first on the wages and then on any self-employment income necessary to make up the annual maximum amount. The maximum amount of annual earnings to which the contribution rates are applied was \$6,600 in calendar years 1966 and 1967. Beginning with calendar year 1968, the maximum amount is \$7,800.

Under the Internal Revenue Code, as amended, the contribution rate for old-age, survivors, and disability insurance for employees and their employers of 3.85 percent each that was in effect in calendar year 1966 increased to 3.9 percent each on January 1, 1967; the contribution rate for the self-employed rose from 5.8 to 5.9 percent. The tax rates that have been in effect since 1937 and the maximum amount of annual earnings to which the rates applied are shown in appendix II.

The following table shows the scheduled tax rates in the present law :

Calendar years	Percent of taxable earnings	
	Employees and employers, each ¹	Self-employed
1967.....	3.9	5.9
1968.....	3.8	5.8
1969-70.....	4.2	6.3
1971-72.....	4.6	6.9
1973 and after.....	5.0	7.0

¹ Only the employee tax is paid on tips that are taxable as wages.

² These decreases in rates from 1967 to 1968 were exactly counterbalanced by increases in the contribution rates for hospital insurance.

Under section 201(b) of the Social Security Act as amended in 1967, the contribution rate allocated to the disability insurance trust fund of 0.35 percent each for employees and employers, in effect in calendar years 1966 and 1967, increased to 0.475 percent each on January 1, 1968. For the self-employed, the allocation rate increased from 0.525 percent, in effect in calendar years 1966 and 1967, to 0.7125 percent in calendar year 1968.

Except for amounts received by the Secretary of the Treasury under State agreements (to effectuate coverage under the program for State and local government employees) and deposited directly in the trust funds, all contributions are collected by the Internal Revenue Service and are paid into the Treasury as internal revenue collections. However, sums equivalent to 100 percent of these taxes are transferred to the trust funds from time to time. Such transfers are first made on the basis of estimated tax receipts. The exact amount is not known since old-age, survivors, and disability insurance taxes, hospital insurance taxes, and income taxes withheld are not separately identified in tax-collection reports received by the Treasury Department from the district offices of the Internal Revenue Service. Periodic adjust-

ments are subsequently made to the extent that the estimates are found to differ from the amounts of contributions actually payable on the basis of reported earnings.

An employee who worked for more than one employer during the course of a year and paid contributions on wages in excess of the statutory maximum can receive a refund of the taxes he paid on such excess wages. The amount of taxes subject to refund for any period is a charge against each of the trust funds in the ratio in which the amount was appropriated to or deposited in such trust funds for that period.

Another source from which receipts of the trust funds are derived is interest received on investments held by the funds. The investment procedures of the funds are described later in this section.

The income and expenditures of the trust funds are also affected by the provisions of the Railroad Retirement Act of 1937, as amended, which provide for a system of coordination and financial interchange between the railroad retirement program and the old-age, survivors, and disability insurance program. A description of the legislative provisions governing the allocation of costs between the two programs appears in appendix II.

Sections 217(g) and 229(b) of the Social Security Act, as amended by the 1967 amendments, authorize annual reimbursements from the general fund of the Treasury to the old-age and survivors insurance and disability insurance trust funds for any costs arising from the granting of noncontributory credits for military service, according to periodic determinations made by the Secretary of Health, Education, and Welfare. A summary of the legislative history of the financing of noncontributory credits for military service performed before 1957 appears in appendix II.

Section 228 of the Social Security Act, as amended, provides monthly cash benefits to certain persons aged 72 and over, almost all of whom are not eligible for cash benefits under other provisions of the old-age, survivors, and disability insurance program. Under section 228, all payments are made initially from the old-age and survivors insurance trust fund, with later reimbursement from the general fund of the Treasury for the costs of payments to persons who have less than 3 quarters of coverage. A description of the legislative provisions governing the allocation of costs between the trust fund and the general fund of the Treasury appears in appendix II.

Under a decision of the Comptroller General of the United States (B-4906) dated October 11, 1951, receipts derived from the sale of surplus supplies and materials are credited to and form a part of the trust funds, where the initial outlays therefor were paid from the trust funds. Formerly, these moneys were credited to the general fund of the Treasury as miscellaneous receipts.

Under section 1106(b) of the Social Security Act, as amended, the Secretary of Health, Education, and Welfare is authorized to charge outside persons, agencies, and organizations for providing certain services not directly related to the old-age, survivors, and disability insurance program. The Social Security Administration has accumulated a unique body of information in the course of the administration of the program. Situations arise when it is in the public interest to use this information to perform certain services for outside parties, such

as the preparation of statistical tabulations for research purposes, when such services can be performed without violating the confidentiality of the records or interfering unduly with the administration of the program. Such services could not properly be provided at the expense of the trust funds. Receipts derived from performance of these services are equal to the cost of providing them; in some instances, the receipts are credited to the trust funds to counterbalance administrative expenses already paid from the trust funds (in which case such amount is netted out of the figures on administrative expenses in the financial statements of the trust funds), while in other instances such receipts are not credited to the trust funds, and the applicable administrative expenses are met directly from them. Accordingly, such administrative expenses, and the offsetting receipts, do not have any effect on the financial statements of the trust funds.

Expenditures for benefit payments and administrative expenses under the old-age, survivors, and disability insurance program are paid out of the trust funds. All expenses incurred by the Department of Health, Education, and Welfare and by the Treasury Department in carrying out the provisions of title II of the Social Security Act, as amended, and of the Internal Revenue Code relating to the collection of contributions, are charged to the trust funds. The Secretary of Health, Education, and Welfare certifies benefit payments to the managing trustee, who makes the payment from the respective trust funds in accordance therewith.

Section 222(d) of the Social Security Act, as amended, provides for reimbursement from the trust funds for the cost of vocational rehabilitation services furnished to disabled persons receiving benefits because of their disability. The total amount of funds that may be made available for purposes of reimbursement for such services may not, in any fiscal year, exceed 1 percent of the benefits certified for payment to these types of beneficiaries in the preceding year.

Congress has authorized expenditures from the trust funds for construction of office buildings and related facilities for the Social Security Administration. The costs of such construction are included as part of administrative expenses in the financial statements of operations of the trust funds as set forth in subsequent sections of this report. The net worth of the resulting facilities—just as the net worth of all other capital assets—is not carried as an asset in such statements.

That portion of each trust fund which, in the judgment of the managing trustee, is not required to meet current expenditures for benefits and administration is invested in interest-bearing obligations of the U.S. Government, in obligations guaranteed as to both principal and interest by the United States, or in certain federally-sponsored agency obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States. Obligations of these types may be acquired on original

issue at the issue price or by purchase of outstanding obligations at their market price.

In addition, the Social Security Act authorizes the issuance of special public-debt obligations for purchase exclusively by the trust funds. The law requires that such special public-debt obligations shall have maturities fixed with due regard for the needs of the trust funds and shall bear interest at a rate based on the average market yield (computed by the managing trustee on the basis of market quotations as of the end of the calendar month next preceding the date of such issue) on all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable until after the expiration of 4 years from the end of such calendar month. Where such average market yield is a multiple of one-eighth of 1 percent, this is taken as the rate of interest on such special obligations; otherwise such rate is the multiple of one-eighth of 1 percent nearest such market yield.

Interest on public issues held by the trust funds is received by the funds at the time the interest is paid on the particular issues held. Interest on special public-debt obligations issued specifically for purchase by the trust funds is payable semiannually or, if earlier, at redemption.

Marketable public issues acquired by the funds may be sold at any time by the managing trustee at their market price. Special public-debt obligations issued for purchase by the trust funds may be redeemed at par plus accrued interest. Interest receipts and proceeds from the sale or redemption of obligations held in the trust funds are available for investment in the same manner as other receipts of the funds. Interest earned by the invested assets of the trust funds will provide income to meet a portion of future benefit disbursements. The role of interest in meeting future benefit payments is indicated in tables 21 and 22.

In addition to serving as a source of income, the assets of the trust funds assure the continued payment of benefits without sharp changes in contribution rates during periods of short-run adverse fluctuations in total income and expenditures.

SUMMARY OF THE OPERATIONS OF THE FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND, FISCAL YEAR 1967

A statement of the income and disbursements of the Federal old-age and survivors insurance trust fund in the fiscal year which began on July 1, 1966, and ended on June 30, 1967, and of the assets of the fund at the beginning and end of the fiscal year, is presented in table 2.

The total assets of the old-age and survivors insurance trust fund amounted to \$19,872 million on June 30, 1966. These assets increased to \$23,515 million by the end of the fiscal year 1967, an increase of \$3,643 million.

TABLE 2.—STATEMENT OF OPERATIONS OF THE OLD-AGE AND SURVIVORS INSURANCE TRUST FUND DURING THE FISCAL YEAR 1967

Total assets of the trust fund, June 30, 1966.....		\$19, 872, 235, 650. 35
Receipts, fiscal year 1967:		
Contributions:		
Appropriations.....	\$20, 994, 312, 207. 80	
Deposits arising from State agreements.....	1, 835, 408, 473. 55	
Gross contributions.....	22, 829, 720, 681. 35	
Less payment into the Treasury for taxes subject to refund.....	262, 718, 875. 00	
Net contributions.....	22, 567, 001, 806. 35	
Reimbursement from general fund of the Treasury for costs of non-contributory credits for military service.....	78, 000, 000. 00	
Interest and profit:		
Interest and profit on investments.....	725, 327, 101. 43	
Interest on administrative expenses reimbursed from—		
Hospital insurance trust fund.....	84, 145. 00	
Supplementary medical insurance trust fund.....	989, 000. 00	
Gross interest and profit.....	726, 400, 246. 43	
Less interest on amounts transferred to disability insurance trust fund for reimbursement of—		
Administrative expenses.....	497, 170. 00	
Cost of vocational rehabilitation services.....	2, 000. 00	
Net interest and profit.....	725, 901, 076. 43	
Total receipts.....	23, 370, 902, 882. 78	
Disbursements, fiscal year 1967:		
Benefit payments.....	18, 885, 714, 203. 69	
Transfers to railroad retirement account.....	508, 046, 000. 00	
Reimbursement to disability insurance trust fund for cost of vocational rehabilitation services for disabled beneficiaries.....	88, 000. 00	
Administrative expenses:		
Department of Health, Education, and Welfare.....	298, 108, 208. 31	
Treasury Department.....	52, 422, 814. 66	
Construction of facilities for Social Security Administration.....	1, 170, 516. 86	
Reimbursement to disability insurance trust fund due to adjustment in allocation of administrative expenses for fiscal year 1966.....	10, 751, 385. 00	
Gross administrative expenses.....	362, 452, 924. 83	
Less receipts from sale of surplus supplies, materials, etc....	30, 019. 21	
Less reimbursements for administrative expenses from—		
Hospital insurance trust fund ¹	2, 850, 292. 00	
Supplementary medical insurance trust fund ²	25, 541, 504. 00	
Less reimbursement for construction from supplementary medical insurance trust fund.....	129, 889. 00	
Net administrative expenses.....	333, 901, 220. 62	
Total disbursements.....	19, 727, 749, 424. 31	
Net addition to the trust fund.....		3, 643, 153, 458. 47
Total assets of the trust fund, June 30, 1967.....		23, 515, 389, 108. 82

¹ Amount represents sum of (a) \$2,107,000 for a payment made initially from the old-age and survivors insurance trust fund in fiscal year 1967 for expenses of the Public Health Service and (b) \$743,292 due to adjustment in interfund allocation of expenses of the Department of Health, Education, and Welfare for fiscal year 1966.

² Amount represents sum of payments made initially from the old-age and survivors insurance trust fund amounting to (a) \$24,095,779 in fiscal year 1966 for expenses of the Department of Health, Education, and Welfare, (b) \$40,725 in fiscal year 1966 for expenses of the Civil Service Commission, and (c) \$1,405,000 in fiscal year 1967 for expenses of the Public Health Service.

Net receipts of the trust fund during the fiscal year 1967 amounted to \$23,371 million. Of this total, \$20,994 million represented tax collections appropriated to the fund and \$1,835 million represented amounts received by the Secretary of the Treasury in accordance with State agreements for coverage of State and local government employees and deposited in the trust fund. As an offset, \$263 million was transferred from the trust fund into the Treasury as repayment for the estimated amount of contributions subject to refund to employees who worked for more than one employer during the course of a year and paid contributions on wages in excess of the statutory maximum earnings base.

Net contributions amounted to \$22,567 million, representing an increase of 26 percent over the amount for the preceding fiscal year. This large increase resulted from (1) the increase in the maximum annual amount of earnings taxable from \$4,800 to \$6,600 that became effective on January 1, 1966, (2) the increase, from $6\frac{3}{4}$ percent to 7 percent, in the combined employer-employee contribution rate allocated to finance benefits from the old-age and survivors insurance trust fund that also went into effect on January 1, 1966, (3) the increase in the combined employer-employee rate from 7 percent to 7.1 percent that became effective on January 1, 1967, (4) the requirement that certain nonfarm self-employed persons make estimated payments of their social security tax contributions on a quarterly basis effective for taxable years beginning after December 31, 1966 (instead of paying annually after the end of the taxable year), and (5) the high level of employment and taxable earnings. Although the first change became effective in 1966, fiscal year 1967 was the first full year during which it was operative.

Reference has been made in earlier sections to provisions under which the old-age and survivors insurance and disability insurance trust funds are to be reimbursed annually from the general fund of the Treasury for costs of granting noncontributory credits for military service performed before 1957. In accordance with these provisions, the Secretary of Health, Education, and Welfare determined, in September 1965, that the annual amount due for the old-age and survivors insurance trust fund was \$87.4 million, and for the disability insurance trust fund, \$18.4 million.

The first annual reimbursement, for fiscal year 1966, amounting to \$78 million for the old-age and survivors insurance trust fund and \$16 million for the disability insurance trust fund, was received in July 1966.

The remaining \$726 million of receipts consisted of net interest and profit on the investments of the fund.

Disbursements from the trust fund during the fiscal year 1967 totaled \$19,728 million. Of this total, \$18,886 million was for benefit payments, an increase of $4\frac{1}{2}$ percent over the corresponding amount paid in the fiscal year 1966. This increase resulted from (1) the expected growth in the number of beneficiaries as the program gradually matures and the gradual upward trend in the average monthly amount of benefits under the program, (2) the amendments in March 1966 that provided monthly benefits, effective for October 1966, for certain noninsured persons aged 72 and over, and (3) the provisions of the 1965 amendments that liberalized the conditions under which persons could qualify for benefits effective for September 1965. (Fiscal year 1967 was the first full year during which these provisions of the 1965 amendments were operative.) On the other hand, the increase in benefit payments in fiscal year 1967 was smaller than it would have been had the benefit payments in fiscal year 1966 not included the portions of (1) the general benefit increase and (2) benefits to children aged 18–21 who qualified under the school-attendance provisions—both of which were provided by the 1965 amendments—that were paid in fiscal year 1966 but were attributable retroactively to months in fiscal year 1965.

Reference has been made in an earlier section to provisions of the Railroad Retirement Act which coordinate the railroad retirement

program with old-age and survivors insurance. A description of the legislative provisions governing the financial interchanges arising from the allocation of costs between the two systems is contained in appendix II. In accordance with these provisions, the Railroad Retirement Board and the Secretary of Health, Education, and Welfare determined that a transfer of \$490,900,000 to the railroad retirement account from the old-age and survivors insurance trust fund would place this fund in the same position as of June 30, 1966, as it would have been if railroad employment had always been covered under the Social Security Act. This amount was transferred to the railroad retirement account in May 1967, together with interest to the date of transfer amounting to \$17,146,000.

Expenditures, in the form of reimbursement to the disability insurance trust fund, for the cost of vocational rehabilitation services amounted to \$88,000. These services were furnished to disabled adults—dependents of old-age beneficiaries and survivors of deceased insured workers—receiving benefits from the old-age and survivors insurance trust fund on the basis of disabilities that have continued since childhood. (Related administrative expenses of the Department of Health, Education, and Welfare, amounting to \$7,000, are included in the net administrative expenses of the trust fund.

The remaining \$334 million of disbursements from the old-age and survivors insurance trust fund represents net administrative expenses. This amount reflects the effect of a reimbursement, made in December 1966, for the administrative expenses of the Social Security Administration incurred in fiscal year 1966 under the supplementary medical insurance program and initially charged to the old-age and survivors insurance trust fund. The administrative expenses of the Social Security Administration that were incurred under the supplementary medical insurance program in fiscal year 1967, however, were charged directly to the supplementary medical insurance trust fund. Thus, the net amount of administrative expenses for the old-age and survivors insurance trust fund was lower in fiscal year 1967 than it would have been without the reimbursement from the supplementary medical insurance trust fund.

Net administrative expenses expressed as a percentage of contribution income and of benefit payments for each of the last 5 years is shown in table 3 for the old-age and survivors insurance and disability insurance trust funds combined, as well as for each trust fund separately. In order to make the method of calculating the percentages for fiscal year 1967 the same as the method used in prior years, the net amount of administrative expenses for the old-age and survivors insurance trust fund was adjusted upward by the addition of the amount of the reimbursement from the supplementary medical insurance trust

fund for administrative expenses of the Social Security Administration. The adjustments made to the net amounts of administrative expenses of, as well as the benefit payments from, the old-age and survivors insurance and disability insurance trust funds for calculating the percentages for fiscal year 1966 are described in the 1967 Annual Report of the Board of Trustees.

TABLE 3.—RELATIONSHIP OF NET ADMINISTRATIVE EXPENSES OF THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM TO CONTRIBUTION INCOME AND BENEFIT PAYMENTS, BY TRUST FUND, FISCAL YEARS 1963-67

Fiscal year	Total		Old-age and survivors insurance trust fund		Disability insurance trust fund	
	Total administrative expenses as a percentage of—		Administrative expenses as a percentage of—		Administrative expenses as a percentage of—	
	Total contribution income	Total benefit payments	Contribution income	Benefit payments	Contribution income	Benefit payments
1963.....	2.3	2.2	2.0	1.9	6.2	5.7
1964.....	2.2	2.3	2.0	2.1	5.9	5.4
1965.....	2.2	2.2	1.9	1.9	6.7	5.5
1966.....	2.1	2.1	1.8	1.8	5.8	5.4
1967.....	1.8	2.2	1.6	1.9	4.4	5.3

Note: In interpreting the figures in the above table, reference should be made to the accompanying text.

In table 4, the experience with respect to actual amount of contributions and benefit payments in fiscal year 1967 and trust fund assets at the end of the year is compared with the estimates for fiscal year 1967 which appeared in the 1966 and 1967 Annual Reports of the Board of Trustees. The only amendments significant from a cost standpoint which were enacted during the period covered by these reports were those contained in Public Law 89-368. These amendments were enacted in March 1966 between the time of publication of the 1966 and 1967 reports. The effect of these amendments, as originally estimated at time of enactment, on the operations of the old-age and survivors insurance trust fund in fiscal year 1967, as shown in the 1966 report, would have been to increase contribution income and benefit payments by approximately 1 percent. Estimated contribution income of the disability insurance trust fund in fiscal year 1967 would, similarly, have been increased by about 1 percent; estimated benefit payments would not have been affected.

The estimates shown in the 1966 report (modified to take into account the effect of the legislation in 1966), particularly those of contributions and assets, were not as close, relatively, as the corresponding estimates shown in the 1967 report. This was due primarily to the fact that the levels of employment and taxable earnings in 1966 and 1967 were higher than had been anticipated when the 1966 report was prepared.

TABLE 4.—COMPARISON OF ACTUAL AND ESTIMATED OPERATIONS OF THE OLD-AGE AND SURVIVORS INSURANCE AND DISABILITY INSURANCE TRUST FUNDS, FISCAL YEAR 1967

[Amounts in millions]

Estimate as percentage of actual.....		100	87

Note. In interpreting the figures in the above table, reference should be made to the accompanying text.

The distribution of benefit payments in fiscal years 1966 and 1967, by type of beneficiary, is shown in table 5. Approximately 73 percent of the total benefit payments from the old-age and survivors insurance trust fund in the fiscal year 1967 was accounted for by monthly benefits to retired workers and their dependents and about 13 percent by monthly benefits to aged survivors of deceased workers. Approximately 12 percent of the benefit payments represented monthly benefits on behalf of children of deceased workers and monthly benefits to mothers who had children of deceased workers in their care.

Benefit payments to noninsured persons aged 72 and over, which began in November 1966, amounted to \$199.7 million, or about 1 percent of total benefit payments from the trust fund. (Reference has been made in an earlier section to the legislative provisions governing reimbursement from the general fund of the Treasury for the costs of such payments to persons who have fewer than three quarters of coverage.) Of this amount, \$198.5 million, or 99.4 percent, was paid to persons with fewer than three quarters of coverage. This amount, together with interest and the administrative expenses of making these payments, is authorized to be reimbursed to the trust fund in fiscal year 1969. The Budget Document of the United States for the fiscal year 1969 makes provision for this reimbursement.

The balance of the benefits paid consisted of lump-sum death payments.

TABLE 5.—ESTIMATED DISTRIBUTION OF BENEFIT PAYMENTS FROM THE OLD-AGE AND SURVIVORS INSURANCE TRUST FUND, BY TYPE OF BENEFICIARY AND PAYMENT, FISCAL YEARS 1966 AND 1967

[Amounts in millions]

	1966 ¹		1967

Noninsured persons aged 72 and over ²			199.7	1
Lump-sum death payments.....	224.5	1	246.1	1

¹ Benefit payments in 1966 include the portions of (1) the general benefit increase and (2) benefits to children aged 18 to 21 who qualified under the school-attendance provisions—both of which were provided by the 1965 amendments—that were paid in fiscal year 1966 but were attributable retroactively to months in fiscal year 1965.

² Less than 0.5 percent.

³ Benefits were effective for months beginning October 1966, and disbursements from the trust fund were first made to these beneficiaries in November 1966; the trust fund is reimbursed from the general fund of the Treasury for the costs of payments to beneficiaries with less than 3 quarters of coverage.

On June 30, 1967, about 23.2 million persons were receiving monthly benefits under the old-age, survivors, and disability insurance program. About 21.1 million of these persons were receiving monthly benefits from the old-age and survivors insurance trust fund. Average monthly family benefits on that date showed moderate increases over the corresponding averages a year earlier. This is illustrated, for selected beneficiary family groups, in table 6.

TABLE 6.—ESTIMATED AVERAGE MONTHLY BENEFITS FOR SELECTED FAMILY GROUPS RECEIVING BENEFITS UNDER THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM, END OF FISCAL YEARS 1966 AND 1967

Beneficiary family group	Average monthly amount per family	
	June 30, 1966	June 30, 1967
Retired worker alone (no dependents receiving benefits).....	\$80	\$81
Retired worker and wife, aged 62 and over, both receiving benefits ¹	142	144
Aged widow alone.....	74	75
Widowed mother and 2 children.....	220	222
Disabled worker alone (no dependents receiving benefits).....	96	96
Disabled worker, wife (under age 65 ²), and 1 or more children.....	212	213

¹ Excludes wife aged 62 to 64 with entitled children in her care.

² With entitled children in her care.

The assets of the old-age and survivors insurance trust fund at the end of fiscal year 1967 totaled \$23,515 million, consisting of \$21,764 million in the form of obligations of the U.S. Government or of federally sponsored agency obligations, and \$1,751 million in undisbursed balances. Table 7 shows a comparison of the total assets of the fund and their distribution at the end of fiscal years 1966 and 1967.

¹ Par value, plus unamortized premium, less discount outstanding.

The net increase in the par value of the investments owned by the fund during the fiscal year 1967 amounted to \$3,855 million. New securities at a total par value of \$28,324 million were acquired during the fiscal year through the investment of receipts and the reinvestment of funds made available from the maturity or sale of securities. The par value of securities redeemed during the fiscal year was \$24,436 million. In addition, \$34 million of federally-sponsored agency securities were sold, providing additional income to the fund in the form of a profit amounting to about \$100,000. A summary of transactions for the fiscal year, by type of security, is presented in table 8.

The 1956 amendments provided that the public-debt obligations issued for purchase by the old-age and survivors insurance trust fund and the disability insurance trust fund shall have maturities fixed with due regard for the needs of the funds. Under this provision, the general practice has been to spread the maturity dates for the holdings of special issues as nearly as practicable in equal amounts over a 15-year

period. Thus, on June 30, 1967, special issues held by the old-age and survivors insurance trust fund were distributed in equal amounts of \$1,080 million maturing in each of the years 1968-80 (table 7). In addition, \$1,080 million was invested in 5-year notes bearing 4 $\frac{7}{8}$ percent interest and maturing on June 30, 1971, and \$2,720 million was invested in 7-year notes bearing 4 $\frac{3}{4}$ percent interest and maturing on June 30, 1974.

The 5-year notes were acquired on June 30, 1966, under the following circumstances. If, on June 30, 1966, trust-fund holdings of special issues were spread equally over a 15-year period, it would have been necessary for the Treasury to issue, for purchase by the trust fund, 15-year bonds maturing in 1981. Such issue—with more than 5 years to maturity—would have been required, under the then existing law (31 U.S.C. 752 and 753(a)), to bear an interest rate no higher than 4 $\frac{1}{4}$ percent. On the other hand, the application of section 201(d) of the Social Security Act, relating to the determination of the interest rate on special issues, resulted in a rate of 4 $\frac{7}{8}$ percent. Accordingly, a sum of \$1,080 million that would have been invested in bonds maturing in 1981 was, instead, invested in notes for the longest possible duration to maturity; that is, in 4 $\frac{7}{8}$ -percent notes maturing June 30, 1971. The 7-year notes were acquired on June 30, 1967, under similar circumstances; however, the law (31 U.S.C. 753(a)) limiting the maturity date for notes to not more than 5 years from date of purchase had been amended (Public Law 90-39, approved June 30, 1967), extending the limitation to 7 years. (Similarly, with respect to assets of the disability insurance trust fund at the end of fiscal year 1967, some \$75 million was invested in 4 $\frac{7}{8}$ -percent 5-year notes maturing on June 30, 1971, and \$309 million was invested in 4 $\frac{3}{4}$ -percent 7-year notes maturing on June 30, 1974.)

SUMMARY OF THE OPERATIONS OF THE FEDERAL DISABILITY INSURANCE TRUST FUND, FISCAL YEAR 1967

A statement of the income and disbursements of the Federal disability insurance trust fund during fiscal year 1967 and of the assets of the fund at the beginning and end of the fiscal year is presented in table 9.

The total assets of the disability insurance trust fund amounted to \$1,686 million on June 30, 1966. These assets increased by \$335 million during the fiscal year, to \$2,022 million at the end of the year.

period. Thus, on June 30, 1967, special issues held by the old-age and survivors insurance trust fund were distributed in equal amounts of \$1,080 million maturing in each of the years 1968-80 (table 7). In addition, \$1,080 million was invested in 5-year notes bearing 4 $\frac{7}{8}$ percent interest and maturing on June 30, 1971, and \$2,720 million was invested in 7-year notes bearing 4 $\frac{3}{4}$ percent interest and maturing on June 30, 1974.

The 5-year notes were acquired on June 30, 1966, under the following circumstances. If, on June 30, 1966, trust-fund holdings of special issues were spread equally over a 15-year period, it would have been necessary for the Treasury to issue, for purchase by the trust fund, 15-year bonds maturing in 1981. Such issue—with more than 5 years to maturity—would have been required, under the then existing law (31 U.S.C. 752 and 753(a)), to bear an interest rate no higher than 4 $\frac{1}{4}$ percent. On the other hand, the application of section 201(d) of the Social Security Act, relating to the determination of the interest rate on special issues, resulted in a rate of 4 $\frac{7}{8}$ percent. Accordingly, a sum of \$1,080 million that would have been invested in bonds maturing in 1981 was, instead, invested in notes for the longest possible duration to maturity; that is, in 4 $\frac{7}{8}$ -percent notes maturing June 30, 1971. The 7-year notes were acquired on June 30, 1967, under similar circumstances; however, the law (31 U.S.C. 753(a)) limiting the maturity date for notes to not more than 5 years from date of purchase had been amended (Public Law 90-39, approved June 30, 1967), extending the limitation to 7 years. (Similarly, with respect to assets of the disability insurance trust fund at the end of fiscal year 1967, some \$75 million was invested in 4 $\frac{7}{8}$ -percent 5-year notes maturing on June 30, 1971, and \$309 million was invested in 4 $\frac{3}{4}$ -percent 7-year notes maturing on June 30, 1974.)

SUMMARY OF THE OPERATIONS OF THE FEDERAL DISABILITY INSURANCE TRUST FUND, FISCAL YEAR 1967

A statement of the income and disbursements of the Federal disability insurance trust fund during fiscal year 1967 and of the assets of the fund at the beginning and end of the fiscal year is presented in table 9.

The total assets of the disability insurance trust fund amounted to \$1,686 million on June 30, 1966. These assets increased by \$335 million during the fiscal year, to \$2,022 million at the end of the year.

TABLE 9.—STATEMENT OF OPERATIONS OF THE DISABILITY INSURANCE TRUST FUND DURING THE FISCAL YEAR 1967

Total assets of the trust fund, June 30, 1966.....		\$1,686,160,638.08
Receipts, fiscal year 1967:		
Contributions:		
Appropriations.....	\$2,085,603,195.41	
Deposits arising from State agreements.....	183,231,028.81	
Gross contributions.....	2,268,834,224.22	
Less payment into the Treasury for taxes subject to refund.....	19,437,375.00	
Net contributions.....	2,249,396,849.22	
Reimbursement from general fund of the Treasury for costs of non-contributory credits for military service.....	16,000,000.00	
Interest and profit:		
Interest and profit on investments.....	66,340,400.10	
Interest on amounts transferred from old-age and survivors insurance trust fund for reimbursement of—		
Administrative expenses.....	497,170.00	
Cost of vocational rehabilitation services.....	2,000.00	
Total interest and profit.....	66,839,570.10	
Total receipts.....	2,332,236,419.32	
Disbursements, fiscal year 1967:		
Benefit payments.....	1,860,789,067.34	
Transfers to railroad retirement account.....	30,634,000.00	
Payment for cost of vocational rehabilitation services for disabled beneficiaries:		
Gross payment.....	6,622,305.53	
Less reimbursement from old-age and survivors insurance trust fund.....	88,000.00	
Net payment.....	6,534,305.53	
Administrative expenses:		
Department of Health, Education, and Welfare.....	104,021,295.13	
Treasury Department.....	5,065,288.78	
Construction of facilities for Social Security Administration.....	216,408.00	
Expenses of the Department of Health, Education, and Welfare for administration of vocational rehabilitation program for disabled beneficiaries.....	299,000.00	
Gross administrative expenses.....	109,601,991.91	
Less receipts from sale of surplus supplies, materials, etc.....	16,671.63	
Less reimbursement from old-age and survivors insurance trust fund due to adjustment in allocation of administrative expenses for fiscal year 1966.....	10,751,385.00	
Net administrative expenses.....	98,833,935.28	
Total disbursements.....	1,996,791,308.15	
Net addition to the trust fund.....		335,445,111.17
Total assets of the trust fund, June 30, 1967.....		2,021,605,749.25

Net receipts of the fund amounted to \$2,332 million. Of this total, \$2,086 million represented tax collections appropriated to the fund, and \$183 million represented amounts received by the Secretary of the Treasury in accordance with State coverage agreements and deposited in the fund. As an offset, \$19 million was transferred from the trust fund into the Treasury as repayment for the estimated amount of contributions subject to refund to employees who worked for more than one employer during the course of a year and paid contributions on wages in excess of the statutory maximum earnings base. Net contributions amounted to \$2,249 million, representing an increase of about 45 percent over the amount for the preceding fiscal year.

This increase is accounted for, in part, by the same factors that contributed to the increase in tax receipts of the old-age and survivors insurance trust fund and in part by the provision in the 1965 amendments that increased the portion of the contribution rate allocated to finance benefits from the disability insurance trust fund. Effective January 1, 1966, the allocated rate for employees and employers was increased from 0.25 percent each of taxable earnings to 0.35 percent

each. For the self-employed, the allocated rate was increased from 0.375 percent to 0.525 percent. Although these increases became effective in 1966, fiscal year 1967 was the first full year during which they were operative.

An additional \$16 million, received in July 1966, represented the first annual reimbursement (for fiscal year 1966) from the general fund of the Treasury for the costs of noncontributory credits for military service.

The remaining \$67 million of receipts consisted of net interest and profit on the investments of the fund.

Disbursements from the fund during the fiscal year 1967 totaled \$1,997 million. Of this total, \$1,861 million was for benefit payments, an increase of 8 percent over the corresponding amount paid in the fiscal year 1966. This increase is accounted for by the same factors, insofar as they apply to disabled-worker beneficiaries and their dependents, that resulted in the increase in benefit payments from the old-age and survivors insurance trust fund (described in the preceding section).

Provisions governing the financial interchanges between the railroad retirement account and the disability insurance trust fund are similar to those described in the preceding section relating to the old-age and survivors insurance trust fund. The determination made as of June 30, 1966, required that a transfer of \$29,600,000 be made from the disability insurance trust fund to the railroad retirement account. This amount was transferred to the railroad retirement account in May 1967, together with interest to the date of transfer amounting to \$1,034,000.

The remaining disbursements amounted to \$99 million for net administrative expenses and \$7 million for the net cost of vocational rehabilitation services furnished to disabled-worker beneficiaries and to those dependents of disabled workers who are receiving benefits on the basis of disabilities that have continued since childhood.

Section 222(d) of the Social Security Act, as amended, provides that the total amount of funds that may be made available for payment for the costs of vocational rehabilitation services, including applicable administrative expenses, in a fiscal year may not exceed 1 percent of the benefits certified for payment in the preceding year from the old-age and survivors insurance trust fund and the disability insurance trust fund to disabled persons receiving benefits because of their disability. The following table shows the relationship between the total amounts made available in fiscal years 1966 and 1967 for payment for the costs of such rehabilitation services and the corresponding amounts of benefit payments from the trust funds to disabled beneficiaries in fiscal years 1965 and 1966 respectively (amounts in thousands) :

Fiscal year	Estimated amount of benefit payments in preceding fiscal year to disabled beneficiaries	Payment for costs of rehabilitation services ¹	
		Total	As percent of preceding year's benefit payments
1966.....	\$1,220,337	\$588	0.05
1967.....	1,483,662	29,643	.65

¹ Expenditures from the trust funds for payment for costs of rehabilitation services for disabled beneficiaries were first authorized under the 1965 amendments and began in fiscal year 1966. The amounts shown represent the expenditures for the fiscal year and differ from amounts shown in accounting statements of the trust funds on a cash basis.

² Preliminary figure (final figure will not exceed this amount).

At the end of fiscal year 1967, some 2,060,000 persons were receiving monthly benefits from the disability insurance trust fund. The distribution of benefit payments in fiscal years 1966 and 1967, by type of benefit, is shown in table 10.

TABLE 10.—ESTIMATED DISTRIBUTION OF BENEFIT PAYMENTS FROM THE DISABILITY INSURANCE TRUST FUND, BY TYPE OF BENEFICIARY, FISCAL YEARS 1966 AND 1967

[Amounts in millions]

	1966 ¹		1967	
	Amount	Percent of total	Amount	Percent of total
Total.....	\$1,721.1	100	\$1,860.8	100
Disabled workers.....	1,350.3	78	1,456.3	78
Wives and husbands.....	104.4	6	111.3	6
Children.....	266.4	15	293.1	16

¹ Benefit payments in 1966 include the portions of (1) the general benefit increase and (2) benefits to children aged 18 to 21 who qualified under the school-attendance provisions—both of which were provided by the 1965 amendments—that were paid in fiscal year 1966 but were attributable retroactively to months in fiscal year 1965.

The assets of this fund at the end of fiscal year 1967 totaled \$2,022 million, consisting of \$1,833 million in the form of obligations of the U.S. Government, and \$189 million in undisbursed balances. Table 11 shows a comparison of the total assets of the fund and their distribution at the end of fiscal years 1966 and 1967.

¹ Par value, plus unamortized premium, less discount outstanding.

The net increase in the par value of the investments owned by the fund during the fiscal year amounted to \$370 million. New securities at a total par value of \$2,969 million were acquired during the fiscal year through the investment of receipts of the fund and the reinvestment of funds made available from the maturity or sale of securities. The par value of securities redeemed during the year was \$2,565 million. In addition, \$34 million of federally-sponsored agency securities were sold, providing additional income to the fund in the form of a profit amounting to about \$100,000. A summary of transactions for the fiscal year, by type of security, is presented in table 12.

EXPECTED OPERATIONS AND STATUS OF THE TRUST FUNDS DURING THE PERIOD JULY 1, 1967, TO DECEMBER 31, 1972

In the following statement of the expected operations and status of the trust funds during the period July 1, 1967 to December 31, 1972, it is assumed that present statutory provisions affecting the old-age, survivors, and disability insurance program remain unchanged throughout the period. The estimates shown in the various tables in this section reflect the effect of the 1967 amendments to the Social Security Act, as described in a previous section. The income and disbursements of the program, however, are affected by general economic conditions as well as by legislative provisions. Because it is difficult to foresee economic developments, the assumptions and the resulting estimates

here presented are subject to some uncertainty. This statement of the expected operations of the trust funds should therefore be read with full recognition of the difficulties of estimating future trust fund income and disbursements under changing economic conditions.

Table 13 presents data on the actual operations of the old-age and survivors insurance trust fund for selected fiscal years during the period 1937-67¹ and also estimates of the expected operations of the trust fund in fiscal years 1968-72. The estimates are based on the assumption that economic activity will expand throughout the period, with employment and earnings increasing steadily through 1972. Under this assumption, the estimated number of persons with taxable earnings under the old-age, survivors, and disability insurance program is expected to increase from 86.7 million during calendar year 1967 to 96.6 million during calendar year 1972; their taxable earnings are estimated to increase from \$329 billion in 1967 to \$369 billion in 1968 and to \$438 billion in 1972. The increase in estimated total taxable earnings and income from contributions in fiscal years 1968-72 reflects the assumed upward trend in the levels of employment and earnings, as well as the effects of the increase in the maximum amount of earnings taxable and creditable under the program, effective January 1, 1968, and the scheduled changes in contribution rates. Benefit disbursements increase primarily because of the recent amendments and partly because of the long-range upward trend in the number of beneficiaries and in the average monthly amount of benefits under the program. Aggregate income of the old-age and survivors insurance trust fund is expected to exceed aggregate outgo in the 5-year period covering fiscal years 1968-72. During this period, there is an estimated net increase in the old-age and survivors insurance trust fund of \$25.2 billion.

¹ Data relating to the operations of the old-age and survivors insurance trust fund for years not shown in tables 13-16 are contained in the 1967 annual report of the Board of Trustees.

¹ Under sec. 228 of the Social Security Act, as amended, the trust fund is reimbursed from the general fund of the Treasury for the cost of payments to beneficiaries with less than 3 quarters of coverage.

² Includes net profits on marketable investments and, for 1958-68, adjustment for interest on administrative-expense transfers between the old-age and survivors insurance trust fund and the other social security trust funds (see footnote 4 below).

³ Beginning in 1967, includes relatively small amounts of payments for vocational rehabilitation services furnished to disabled persons receiving benefits from the trust fund because of their disability.

⁴ Total excludes administrative expenses for the period ending Dec. 31, 1939; for that period, appropriations to the old-age and survivors insurance trust fund (designated as the old-age reserve account prior to Jan. 1, 1940) were approximately equivalent to tax contributions collected by the Treasury Department less administrative expenses. Beginning in 1954, includes costs of construction of office space for the Social Security Administration. For years 1957-65, expenses incurred by the

Department of Health, Education, and Welfare under the disability insurance program were initially charged to the old-age and survivors insurance trust fund; reimbursements, including interest, were then made from the disability insurance trust fund in the following fiscal year. For 1966, expenses incurred under the disability insurance program, the hospital insurance program, and the supplementary medical insurance program were initially charged to the old-age and survivors insurance trust fund; reimbursements, including interest, were made from the disability insurance trust fund and the hospital insurance trust fund in June 1966, and from the supplementary medical insurance trust fund in December 1966. Beginning in 1967, expenses incurred under each of the 4 programs are charged directly to the appropriate trust fund on a current (preliminary) basis, with a final adjustment made in the following fiscal year.

Note: In interpreting the estimates, reference should be made to the accompanying text which describes the underlying assumptions. Estimates were prepared in January 1968.

Estimates consistent with those shown on a fiscal-year basis in table 13 are presented in table 14 to show the progress of the old-age and survivors insurance trust fund on a calendar-year basis. The trust fund is expected to increase in each of the 5 calendar years 1968-72, reaching about \$52.0 billion on December 31, 1972.

¹ Total benefit expenditures under sec. 228 of the Social Security Act, as amended; the trust fund is reimbursed from the general fund of the Treasury for the cost of payments to beneficiaries with less than 3 quarters of coverage.

² Partly estimated.
³ Less than \$500,000.

Benefit payments were 6.02 percent of taxable earnings for calendar year 1967 and are estimated to increase to 6.36 percent in 1969. The percentage will remain relatively constant for the next 3 years as the effect of rising taxable earnings offsets the gradual long-term rise in the amount of benefit payments. Figures for selected calendar years during the period 1940-72 are shown in table 16.

The growth in the number of beneficiaries in the past and the expected growth in the future are attributable in large measure to the rising number of workers who are eligible for and receiving old-age (primary) benefits. The growth in the number of eligible workers since 1940 has been uninterrupted. This growth results partly from the increase in the population at these ages and partly from two other factors: (1) in each passing year a larger proportion of the persons attaining age 65 has had fully insured status and (2) the amendments during the period 1950-67 liberalized the eligibility provisions and extended coverage to new categories of employment.

TABLE 16.—OLD-AGE AND SURVIVORS INSURANCE BENEFIT PAYMENTS AS A PERCENTAGE OF TAXABLE EARNINGS,¹ SELECTED CALENDAR YEARS 1940-72

Calendar year	Benefit payments as a percentage of taxable earnings ²	Calendar year	Benefit payments as a percentage of taxable earnings ²
Past experience:		Past experience—Continued	
1940.....	0.11	1965.....	6.88
1945.....	.44	1966.....	6.05
1950.....	1.10	1967.....	6.02
1955.....	3.27	Estimated future experience:	
1960.....	5.33	1968.....	6.22
1961.....	5.85	1969.....	6.36
1962.....	6.31	1970.....	6.36
1963.....	6.52	1971.....	6.36
1964.....	6.53	1972.....	6.35

¹ Percentage takes into account, for 1951 and later, (1) lower contribution rate payable by the self-employed compared with combined employer-employee rate; (2) employee contributions subject to refund; and (3) for 1966 and later, that only the employee tax is payable on tips taxable as wages.

² For 1964-67, percentages are preliminary and subject to revision when complete tabulation of taxable earnings is available. For 1966-72, percentages are based on sum of payments for benefits (excluding payments under sec. 228 of the Social Security Act, as amended, to certain noninsured persons aged 72 and over with less than 3 quarters of coverage, costs of which are financed from the general fund of the Treasury) and for vocational rehabilitation services.

In addition, there has been a growth in the proportion of eligible workers who receive benefits. In the early years of the program, a considerable proportion of the workers who were eligible for old-age (primary) benefits remained in covered employment (or, if they had left covered employment, later returned to it) and therefore did not receive benefits. Since 1945, however, the proportion of eligible workers receiving retirement benefits has been increasing, except for temporary halts due to special circumstances resulting from the amendments of 1950 and 1954. In general, due to the increasing percentage of eligibles aged 72 or over, who receive benefits regardless of earnings, the upward trend in this proportion is expected to continue, although at a slower rate than in the past.

The expected operations and status of the disability insurance trust fund during the next 5 fiscal years are presented in table 17, together with the figures on actual experience in earlier years. Aggregate income of the disability insurance trust fund is expected to exceed aggregate outgo in the 5-year period covering fiscal years 1968-72. During this period there is an estimated net increase in the trust fund of \$4.8 billion.

¹ Includes net profits on marketable investments and, for 1958-68, adjustment for interest on administrative-expenditure transfers between the disability insurance trust fund and the old-age and survivors insurance trust fund (see footnote 2 below).

² For years 1957-65, expenses of the Department of Health, Education, and Welfare under the disability insurance program were initially charged to the old-age and survivors insurance trust fund; reimbursements, including interest, were then made from the disability insurance trust fund in the following fiscal year. For 1966, expenses incurred under the disability insurance program

were initially charged to the old-age and survivors insurance trust fund; reimbursement, including interest, was made from the disability insurance trust fund in June 1966. Beginning in 1967, expenses incurred under the disability insurance program are charged directly to the trust fund on a current (preliminary) basis, with a final adjustment made in the following fiscal year.

Note: Reference should be made to the text which describes the underlying assumptions and limitations. Estimates were prepared in January 1968.

Estimates consistent with those shown on a fiscal year basis in table 17 are presented in table 18 to show the progress of the disability insurance trust fund on a calendar year basis. The trust fund is expected to increase in each of the 5 calendar years 1968-72, reaching about \$7.3 billion on December 31, 1972.

TABLE 18.—OPERATIONS OF THE DISABILITY INSURANCE TRUST FUND, CALENDAR YEARS 1957-72

[In millions]

Calendar year	Transactions during period							Net increase in fund	Fund at end of period
	Income			Disbursements					
	Contributions, less refunds	Reimbursements from general fund of Treasury for cost of noncontributory credits for military service	Interest on investments	Benefit payments	Payments for vocational rehabilitation services	Administrative expenses	Transfers to railroad retirement account

Note: In interpreting the above experience, reference should be made to the footnotes in table 17.

The total amount of disability benefit payments will continue to increase over the next 5 calendar years as the number of beneficiaries and the average monthly benefit amount increase. Disability benefit expenditures as a percentage of taxable payroll will also increase—from 0.61 percent of taxable earnings for calendar year 1967 to an estimated 0.70 percent of taxable earnings in 1969–72, as shown in table 19.

TABLE 19.—DISABILITY INSURANCE BENEFIT PAYMENTS AS A PERCENTAGE OF TAXABLE EARNINGS,¹ CALENDAR YEARS 1957–72

¹ Percentage takes into account (1) lower contribution rate payable by the self-employed compared with combined employer-employee rate; (2) employee contributions subject to refund; and (3) for 1966 and later, that only the employee tax is payable on tips taxable as wages.

² For 1964–67, percentages are preliminary and subject to revision when complete tabulation of taxable earnings is available. For 1966–72, percentages are based on sum of payments for benefits and for vocational rehabilitation services.

Reference has been made in earlier sections to the financial interchanges between the railroad retirement account and the two trust funds, under the provisions of the Railroad Retirement Act. The estimates shown in tables 13, 14, 17, and 18 reflect the effect of future financial interchanges.

Reference has also been made previously to the provisions of section 228 of the Social Security Act, as amended, under which benefits are paid initially from the old-age and survivors insurance trust fund to certain noninsured persons aged 72 and over, with later reimbursement from the general fund of the Treasury for the costs of payments to those in this group who have less than 3 quarters of coverage. The estimates in tables 13–16 reflect the effect of these provisions.

The estimates in tables 13–19 reflect the effect of the provisions in section 222(d) of the Social Security Act, as amended, authorizing expenditures from the old-age and survivors insurance and disability insurance trust funds for the cost of vocational rehabilitation services furnished to disabled beneficiaries.

Reference has been made in earlier sections to statutory provisions of the Social Security Act authorizing annual reimbursements from the general fund of the Treasury to the old-age and survivors insurance and disability insurance trust funds for costs of granting non-contributory credits for military service. The reimbursements for fiscal year 1967, amounting to \$78 million for the old-age and survivors insurance trust fund and \$16 million for the disability insurance trust fund, were received in July 1967. Like amounts have been appropriated by Congress for fiscal year 1968, and it is assumed that the reimbursements will be received by the trust funds in July 1968. More-

over, the Budget Document of the United States for the fiscal year 1969 makes similar provision for another reimbursement to each trust fund. The estimates shown in the various tables in this section reflect the effect of past reimbursements and assume that future reimbursements will be made in similar fashion.

ACTUARIAL STATUS OF THE TRUST FUNDS

Old-age, survivors, and disability insurance benefit payments will increase for many years—not only in dollars but also as a percentage of taxable payroll. Long-range estimates are needed, therefore, to show how much the cost is likely to increase and to indicate whether the scheduled tax rates are adequate.

The cost of benefits to aged persons, which constitute more than 80 percent of the total cost, will rise for several reasons. The U.S. population will, in the long run, almost certainly become relatively much older on the average. A relatively older population will tend to result from the fact that the present aged population is made up of the survivors from past periods when death rates were much higher than they are now. Another such factor is that, after the turn of the century, the larger birth cohorts of the 1940's, 1950's, and 1960's will be attaining retirement age. Thus, in the future, relatively more persons, both in total and in each cohort, will attain age 65 and older ages.

The cost of the program is closely related to the ratio of the population aged 65 and over (potential beneficiaries) to the population aged 20-64 (potential contributors). On January 1, 1968, this ratio was 18.3 percent. In a stationary population that would result if the death rates of the U.S. Life Tables for 1959-61 were applied to a constant annual number of births the ratio would be 25.4 percent, but such a situation is not likely to occur within the next century. Ultimately this ratio may become even greater because decreases in mortality below present rates would, in a stationary population, have the effect of increasing the proportion at the oldest ages.

Another reason for the increasing cost is that the proportion of the aged population eligible for and receiving benefits will increase. Some of the present persons aged 65 and over were not in covered employment long enough to obtain benefits, or, in the case of widows, their husbands were not sufficiently long in covered employment. Although the system began in 1937, many jobs were not covered until 1951 or 1955. It is estimated that the proportion of the aged population eligible for some type of cash benefit under the system will increase from the level of about 90 percent on January 1, 1968 to between 94 and 95

percent in 1980 and between 96 and 98 percent by the end of the century.

Since the long-term future cost of the old-age, survivors, and disability insurance program will be affected by many factors that are difficult to determine, the assumptions used in the actuarial cost estimates may differ widely and yet be reasonable. The long-term cost estimates for the program (shown for 1980 and thereafter) are presented here on a range basis to indicate the plausible variation in future costs depending on the actual trends that develop for the various cost factors. Both the low- and high-cost estimates are based on assumptions of a 4-percent unemployment rate, with the average annual earnings remaining at about the level that prevailed in 1966; thus, changes slightly above and slightly below this level tend to offset each other over the long-range future period considered. Each estimate provides data on taxable payroll and contributions and on beneficiaries and benefit payments for every future year. The data are presented here for selected future years.

It is considered likely, although by no means certain, that actual costs as a percentage of taxable payroll will lie between the low-cost and high-cost figures. Also, a single estimate of costs is needed as a guide in considering proposed legislation and developing tax schedules intended to make the system self-supporting. For these reasons, an intermediate-cost estimate is prepared, in which numbers of beneficiaries, amount of benefit payments, and taxable payrolls are taken halfway between the low-cost and high-cost figures. The intermediate percentage-of-payroll figures are obtained by dividing total benefit payments by taxable payroll, each on the intermediate basis, and are therefore not exactly equal to the average of low-cost and high-cost percentage-of-payroll figures.

Table 20 shows benefit-payment costs for selected years and the corresponding level-costs over the next 75 years, expressed as percentages of taxable payroll, under each of the three estimates. The level-cost of the program on this basis is the constant combined employer-employee tax rate that, together with a tax on the self-employed of about 75 percent of such combined rate (subject to a maximum self-employed tax rate of 7.0 percent), would exactly pay for future benefits and administrative expenses, after making allowance for the effect of the future interest earnings of the existing trust fund and for all other future interest earnings. All percentage-of-payroll figures are adjusted so that they represent the tax rate that employees and employers combined, and the self-employed at three-quarters of the combined rate, would have to pay in any given year to meet exactly the disbursements in that year.

TABLE 20.—ESTIMATED COSTS OF OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE BENEFIT PAYMENTS AS PERCENT OF PAYROLL,¹ 1966 LEVEL-EARNINGS ASSUMPTIONS, 1980-2040

2025.....	62,585	76,292	930	—90	10,933	302,846

¹ Interest rates of 3.25 percent for high-cost, 3.75 percent for intermediate-cost, and 4.25 percent for low-cost, were used in determining the level-cost, but in developing the progress of the trust fund, varying rates in the early years were used, which—when averaged over a long period of time—are equivalent to such fixed rates.

² A positive figure indicates payment from the trust fund to the railroad retirement account; a negative figure indicates the reverse.

³ These figures are artificially high because of the method of reimbursements between this trust fund and the disability insurance trust fund (and, likewise, the figure for 1959 is too low).

Note: Contributions include reimbursement for additional cost of noncontributory credit for military service and benefits include payments for vocational rehabilitation services. Projected data do not include the costs of special benefits to persons aged 72 or over nor the reimbursements thereof.

2025.....	6,598	7,326	233	-20	763	21,384

¹ Interest rates of 3.25 percent for high-cost, 3.75 percent for intermediate-cost, and 4.25 percent for low-cost were used in determining the level-cost, but in developing the progress of the trust fund, varying rates in the early years were used, which—when averaged over a long period of time—are equivalent to such fixed rates.

² A positive figure indicates payment from the trust fund to the railroad retirement account; a negative figure indicates the reverse.

³ These figures are artificially low because of the method of reimbursements between the trust fund and the old-age and survivors insurance trust fund (and, likewise, the figure for 1959 is too high).

Note: Contributions include reimbursement for additional cost of noncontributory credit for military service. Benefits include payments for vocational rehabilitation services.

It should be emphasized that dollar figures projected for so many years into the future have only limited significance because of changes that are likely to occur in the general economy, as well as in the system itself. What is really the most significant are relative figures such as those in table 20, showing the benefit costs as a percentage of taxable payroll.

For old-age and survivors insurance, annual benefit payments as a percentage of payroll are less than the scheduled tax rates in the early future years, but they eventually rise above the ultimate combined employer-employee rate of 9.05 percent. The excess income in the early years, in addition to the interest earned by the fund, will be enough to finance the excess outgo in later years. For disability insurance, annual benefit payments as a percentage of taxable payroll are lower than the level allocation of 0.95 percent until shortly after the year 2000, according to the intermediate cost estimate; under the low-cost estimate, the benefit cost is below the allocation at all times, while under the high-cost estimate, the reverse is the case except before 1980.

To measure the extent to which the financing arrangements of the system result in a surplus or deficiency, a level rate equivalent to the actual increasing contribution rates has been computed, taking into account future interest. The level-equivalent rate of contributions minus the level cost of benefit payments and administrative costs expressed as a percentage of taxable payroll (after making allowance for the interest-earning effect of the existing trust fund), gives the amount by which the contribution rate in all years would have to be changed to put the system in exact long-range balance according to the estimate. A negative figure would indicate that an increase in the tax rate is needed to make the system self-supporting, while a positive figure would indicate that the system is overfinanced.

The long-range balance of the system is shown by the following level-equivalent costs and contributions, expressed in percentages of taxable payroll, which are computed as of the beginning of calendar year 1967, at interest rates of 3.25 percent for high-cost, 3.75 percent for intermediate-cost, and 4.25 percent for low-cost:

[In percent of taxable payroll ¹]

Item	OASI	DI	Total
Low-cost estimate			
Contributions.....	8.77	0.95	9.72
Benefits ²	8.26	.85	9.11
Actuarial balance.....	.51	.10	.61
High-cost estimate			
Contributions.....	8.79	0.95	9.74
Benefits ²	9.40	1.06	10.46
Actuarial balance.....	-.61	-.11	-.72
Intermediate-cost estimate			
Contributions.....	8.78	0.95	9.73
Benefits ²	8.77	.95	9.72
Actuarial balance.....	.01	.00	.01

¹ Based on adjusted payroll that reflects the lower contribution rate on self-employment income, tips, and multiple-employer "excess wages," as compared with the combined employer-employee rate.

² Including adjustments (1) for interest on the existing trust fund; (2) for administrative expenses; (3) for the railroad retirement financial interchange provisions; and (4) for reimbursement of military-wage-credits cost. Includes payments for vocational rehabilitation services.

The old-age, survivors, and disability insurance system as a whole is in actuarial balance (there is a positive balance of 0.01 percent of payroll on the intermediate-cost basis). The old-age and survivors insurance portion of the system has a positive balance of 0.01 percent of payroll, while the disability insurance portion is in exact actuarial balance.

If the intermediate-cost estimate had been based on a higher interest rate than 3.75 percent (which is somewhat below the current average being earned by the total investments of the trust funds, and considerably below the prevailing market rate of interest on long-term Government obligations, which was 5⁵/₈ percent in December 1967), the actuarial balance of the total program would have been considerably improved. Thus, for example, the use of a 4-percent interest rate would increase the actuarial balance of the program by about 0.05

percent of taxable payroll, and a $4\frac{1}{4}$ -percent interest rate would increase it by 0.09 percent of taxable payroll. Similarly, using a $3\frac{3}{4}$ -percent interest rate, a change in the assumed earnings level from that prevailing in 1966 to that prevailing in 1967 would increase the actuarial balance by 0.16 percent of taxable payroll. If the expected 1968 earnings level were assumed instead of the 1966 level, there would be an increase in the actuarial balance of 0.33 percent of taxable payroll.

If the experience exactly follows the assumptions, future computations would show a gradual increase in the actuarial balance (or lack of balance) under the intermediate-cost estimate for both the old-age and survivors insurance system and the disability insurance system. The reason for this is that interest accumulations increase any surplus in the system, but the failure to accumulate all interest income that would have been earned in an exactly balanced system increases any deficit. In the case of a surplus, the excess contributions actually earn interest, while a deficit grows because of the absence of the annual interest that would have been earned if the contributions required for balance had been paid.

Continuing study of the emerging experience under the program provides a basis for prompt changes in the tax rate or other changes that may be necessary to keep the system from growing excessively out of actuarial balance in either direction.

It is important to note that these estimates are made on the assumption that earnings will remain at about the level prevailing in 1966. If earnings levels rise, as they have in the past, the benefits and the taxable earnings base under the program will undoubtedly be modified. In fact, if all other assumed cost factors are closely followed by the experience, then increasing wage levels will automatically generate positive actuarial balances that can be used to increase benefit levels without changing the financing provisions. If such changes are made concurrently and proportionately with changes in general earnings levels, and if the experience follows all the other assumptions, the future year-by-year costs of the system as a percentage of taxable payroll would be the same as those shown. However, the existing trust fund accumulated in the past, and its interest earnings, will represent a smaller proportion of the future taxable payrolls than if earnings were not to increase in future years. As a result, since interest earnings of the trust fund will play a relatively smaller role in the financing of the system, the "net" level-cost—taking into account benefit payments, administrative expenses, and interest on the existing trust fund—would be somewhat higher. However, the level-cost might not rise this much, or might even decline, if benefit adjustments do not fully reflect rising earnings. Again, the effect of such events can be observed in ample time to make any needed changes in the contribution schedule or any other appropriate changes in the system.

This analysis includes the benefits and contributions in respect to all persons anticipated to be covered in the future under present statutory provisions and not merely (a) the benefits to be paid to workers who have been covered by the system in the past and to their dependents and survivors, (b) the future taxes to be paid by, and with respect to, such workers, and (c) the existing trust funds. An insurance company must set up reserves equal to all currently accrued liabilities, since it cannot compel individuals to become new policyholders and must be in a position at any time so that in the future it can pay all benefits that will become due with respect to its present and past policyholders, using only its present assets and the future premiums to be paid by present policyholders. In analyzing the actuarial condition of a compulsory social insurance system that will continue indefinitely, the income and outgo with respect to new entrants should properly be included, thus obviating the need to set up reserves for all currently accrued liabilities.

A discussion of the assumptions under which these estimates have been made is presented in appendix I.

MEDIUM-RANGE COST ESTIMATES

The preceding sections have presented both short-range cost estimates (for the next 5 years) and long-range cost estimates (for many decades into the future) for the old-age, survivors, and disability insurance system. This section presents medium-range cost estimates covering a period of 15 to 20 years that take into account possible variations in economic factors, such as level of earnings and level of employment, as well as variations in demographic factors.

Tables 23 and 24 present two medium-range projections based on different assumptions. For both projections, it is assumed that economic activity will have normal expansion throughout the period, with employment increasing steadily at an average annual rate of $1\frac{3}{4}$ percent and with the average total earnings of covered workers increasing at an annual rate of 3 percent (somewhat higher increases are assumed in the first few years).

In the first projection (table 23), the maximum taxable earnings base is assumed to remain at \$7,800 per year, while for the second one (table 24), the base is assumed to be kept up to date—i.e., changed periodically so as to cover about the same proportion of total earnings that was covered in 1968 by the \$7,800 base. These assumptions imply that, for the first projection, only about three-sevenths of the 73-percent increase in average earnings that is estimated to occur in 1968-85 will be taxable under the program, due to the dampening effect of the fixed maximum taxable earnings base. For the second projection, the entire 73-percent increase will be taxable because of the assumed constant updating of the taxable earnings base.

This analysis includes the benefits and contributions in respect to all persons anticipated to be covered in the future under present statutory provisions and not merely (a) the benefits to be paid to workers who have been covered by the system in the past and to their dependents and survivors, (b) the future taxes to be paid by, and with respect to, such workers, and (c) the existing trust funds. An insurance company must set up reserves equal to all currently accrued liabilities, since it cannot compel individuals to become new policyholders and must be in a position at any time so that in the future it can pay all benefits that will become due with respect to its present and past policyholders, using only its present assets and the future premiums to be paid by present policyholders. In analyzing the actuarial condition of a compulsory social insurance system that will continue indefinitely, the income and outgo with respect to new entrants should properly be included, thus obviating the need to set up reserves for all currently accrued liabilities.

A discussion of the assumptions under which these estimates have been made is presented in appendix I.

MEDIUM-RANGE COST ESTIMATES

The preceding sections have presented both short-range cost estimates (for the next 5 years) and long-range cost estimates (for many decades into the future) for the old-age, survivors, and disability insurance system. This section presents medium-range cost estimates covering a period of 15 to 20 years that take into account possible variations in economic factors, such as level of earnings and level of employment, as well as variations in demographic factors.

Tables 23 and 24 present two medium-range projections based on different assumptions. For both projections, it is assumed that economic activity will have normal expansion throughout the period, with employment increasing steadily at an average annual rate of $1\frac{3}{4}$ percent and with the average total earnings of covered workers increasing at an annual rate of 3 percent (somewhat higher increases are assumed in the first few years).

In the first projection (table 23), the maximum taxable earnings base is assumed to remain at \$7,800 per year, while for the second one (table 24), the base is assumed to be kept up to date—i.e., changed periodically so as to cover about the same proportion of total earnings that was covered in 1968 by the \$7,800 base. These assumptions imply that, for the first projection, only about three-sevenths of the 73-percent increase in average earnings that is estimated to occur in 1968-85 will be taxable under the program, due to the dampening effect of the fixed maximum taxable earnings base. For the second projection, the entire 73-percent increase will be taxable because of the assumed constant updating of the taxable earnings base.

It is assumed for the first projection that all provisions of the law would remain as they were after the 1967 amendments. This projection is based on dynamic earnings-level assumptions and static benefit-provision assumptions. However, over the 18-year period covered by the estimates, changes will undoubtedly be made. The purpose of this estimate is to indicate the size of the financial commitments of present law, even though it is recognized that the law itself will undoubtedly be changed during the period. The extent and timing of these changes are, of course, unpredictable.

It is assumed for the second projection that the maximum taxable earnings base and the benefit provisions of the law are amended periodically so that the relationships among total earnings, taxable earnings, and benefit expenditures during each of the years 1968-85

are the same as those shown in the long-range intermediate-cost estimates prepared on level-earnings assumptions. The cost estimate shown in table 24 is, therefore, very similar to the long-range cost estimate if costs are considered in terms of percentages of taxable payroll, but it has the advantage of presenting dollar figures of a more realistic magnitude. This projection, accordingly, is based on dynamic earnings-level assumptions, combined with an assumption that the law is frequently amended to keep the system fully up-to-date.

As shown in tables 23 and 24, according to the medium-range estimates, the old-age and survivors insurance trust fund grows steadily through the 18-year period—reaching about \$193 billion in 1980 in the first projection and about \$152 billion in the second one. For 1985, the corresponding figures for the balance in the trust fund are \$316 billion and \$230 billion, respectively. In 1985, estimated contribution income exceeds benefit outgo by about 42 percent under the assumptions of dynamic earnings-level conditions and static benefit provisions, both by only 14 percent under the “double dynamic” assumptions basis.

The disability insurance trust fund, according to the first projection, increases rapidly—reaching about \$20 billion in 1980 and about \$32 billion in 1985. According to the second projection, with the “double dynamic” assumptions, the fund increases less rapidly reaching \$16 billion in 1980 and \$20 billion in 1985.

ACTUARIAL ANALYSIS OF BENEFIT DISBURSEMENTS FROM THE FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND WITH RESPECT TO DISABLED BENEFICIARIES

Monthly benefits are payable from the old-age and survivors insurance trust fund to disabled adult children aged 18 and over—sons and daughters of retired and deceased workers—with respect to disabilities that have continued since childhood. These benefits first became payable for January 1957. As a result of the 1967 amendments, reduced monthly benefits are payable from this trust fund, effective February 1968, to disabled widows and widowers beginning at age 50.

On December 31, 1967, about 243,000 persons were receiving monthly benefits from the old-age and survivors insurance trust fund with respect to the disability of children aged 18 and over. This total represents the sum of 218,000 disabled children and 25,000 mothers. These mothers—wives under age 65 of retired-worker beneficiaries and widows of deceased insured workers—met all other qualifying requirements and were receiving benefits solely because they had at least one disabled-child beneficiary in their care. Benefits paid from this trust fund to this class of beneficiaries totaled \$163 million in calendar year 1967, or 0.051 percent of taxable earnings for that year. Similar figures are presented in table 25 to show the past experience in each of the calendar years 1957–67.

Table 25 also shows the expected future experience in calendar years 1968–72. The estimates take into account the initiation, in 1968, of benefit payments to disabled widows and widowers. Total benefit payments from the old-age and survivors insurance trust fund with respect to disabled beneficiaries will increase from \$251 million, or 0.070 percent of taxable payroll, in calendar year 1968, to \$349 million, or 0.082 percent, in 1972.

TABLE 25.—BENEFITS PAYABLE FROM THE OLD-AGE AND SURVIVORS INSURANCE TRUST FUND WITH RESPECT TO DISABLED BENEFICIARIES, CALENDAR YEARS 1957-72

1971	398	320	78	328	257	71	.080	.063	.017
1972	417	335	82	349	275	74	.082	.065	.017

¹ Reflects effect of including a relatively small number (about 25,000 at the end of 1967) of mothers—wives under age 65 of retired-worker beneficiaries and widows of deceased insured workers—who met all other qualifying requirements and were receiving benefits solely because they had at least 1 disabled-child beneficiary in their care.

² Beginning in 1966, includes payments for vocational rehabilitation services.

³ Percentage takes into account (1) lower contribution rate payable by the self-employed compared with combined employer-employee rate, (2) employee contributions subject to refund, and (3) for 1966 and later, that only the employee tax is payable on tips taxable as wages.

In calendar year 1967, benefit payments (including expenditures for vocational rehabilitation services) with respect to disabled persons from the old-age and survivors insurance trust fund and from the disability insurance trust fund (including payments from the latter fund to all dependents of disabled-worker beneficiaries) totaled \$2,113 million, of which \$163 million, or 7.7 percent, represented payments from the old-age and survivors insurance trust fund. Similar figures for all of the calendar years 1957-72 are presented in table 26.

TABLE 26.—BENEFIT PAYMENTS UNDER THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM WITH RESPECT TO DISABLED BENEFICIARIES, BY TRUST FUND, CALENDAR YEARS 1957-72

(In millions)

Calendar year	Total ¹	Benefit payments ¹ from—		
		Disability insurance trust fund ²	Old-age and survivors insurance trust fund	
			Amount ³	As a percentage of total benefit payments with respect to disabled beneficiaries
Past experience:				
1957.....	\$64	\$57	\$7	11.1
1958.....	272	249	23	8.5
1959.....	498	457	41	8.2
1960.....	627	568	59	9.4
1961.....	961	887	74	7.7
1962.....	1,194	1,105	89	7.4
1963.....	1,311	1,210	101	7.7
1964.....	1,422	1,309	113	8.0
1965.....	1,707	1,573	134	7.9
1966.....	1,932	1,784	147	7.6
1967.....	2,113	1,950	163	7.7
Estimated future experience:				
1968.....	2,641	2,390	251	9.5
1969.....	2,893	2,607	286	9.9
1970.....	3,048	2,740	308	10.1
1971.....	3,195	2,867	328	10.3
1972.....	3,335	2,986	349	10.5

¹ Beginning in 1966, includes payments for vocational rehabilitation services.

² Benefit payments to disabled workers and their dependents.

³ Benefit payments to disabled children aged 18 and over, to certain mothers (see footnote 3, table 25), and, beginning in 1968, to disabled widows and widowers.

The long-range level-cost of benefits to disabled workers and their dependents under the disability insurance program is estimated at 0.95 percent of taxable payroll, according to the intermediate-cost estimate. Similarly, the estimated long-range level cost of benefits with respect to disabled beneficiaries under the old-age and survivors insurance program is estimated at 0.10 percent of taxable payroll (table 27), or about 10 percent of the combined level-cost of 1.05 percent of taxable payroll for benefits with respect to disabled beneficiaries under the old-age and survivors insurance and disability insurance programs. These estimates include expenditures for vocational rehabilitation services, which, over the long-range period of the cost estimates, are expected to be offset by shorter durations of disabilities.

TABLE 27.—ESTIMATED COSTS OF DISABILITY BENEFIT PAYMENTS UNDER OLD-AGE AND SURVIVORS INSURANCE PROGRAM AS PERCENT OF PAYROLL,¹ 1966 LEVEL-EARNINGS ASSUMPTION

[In percent]

	Low-cost estimate	High-cost estimate	Intermediate-cost estimate ²
Disabled children aged 18 or over ³	0.07	0.07	0.07
Disabled widows and widowers aged 50 or over.....	.02	.04	.03
Total.....	.09	.11	.10

¹ Taking into account the lower contribution rate on self-employment income, on tips, and on multiple-employer "excess wages," as compared with combined employer-employee rate.

² Based on the average of dollar contributions and dollar costs under the low-cost and high-cost estimates.

³ Including the related mother's and wife's benefits.

The cost of benefits to disabled children aged 18 and over of deceased or retired workers (including the related mother's and wife's benefits) is projected to increase in the future from the current level of 0.05 percent of taxable payroll to a level of 0.07 percent. No significant difference is projected between the low- and high-cost estimates as a result of changes in the mortality rates of workers, since an eligible child may qualify either as a dependent of a retired worker or as a survivor of a deceased worker. Moreover, the proportion of persons in the population with a childhood disability should be expected to remain stable. This occurs because most of their disabling conditions are of a congenital nature.

The cost of benefits to disabled widows and widowers aged 50 and over is projected to increase rapidly and then to level off at about 0.03 percent of taxable payroll. Initially, the cost will increase rapidly because of additional disabled widows and widowers coming on to the rolls each year. However, since the reduction in benefits is permanent, there will be, later, the offsetting effect of lower benefits that will be paid to disabled widows who continue to receive benefits past age 60 (and to disabled widowers past age 62) as compared to the higher nondisabled widow's (and widower's) benefits that would have been otherwise paid.

Wide relative variation in cost is projected between the low-cost estimate and the high-cost estimate. This is due to differences in projected future mortality of insured workers and to differences in projected disability prevalence rates among eligible widows and widowers.

CONCLUSION

The current long-range actuarial cost estimates for the old-age, survivors, and disability insurance system as a whole indicate that the system has a favorable actuarial balance. According to the intermediate-cost estimate, the old-age and survivors insurance program has a favorable actuarial balance of 0.01 percent of taxable payroll on a level-cost basis computed over the next 75 years. The disability insurance program is in exact actuarial balance.

These long-range cost estimates show that the system, as modified by the 1967 amendments, continues to be financed on an actuarially sound basis. Both the old-age and survivors insurance program and the disability insurance program will have sufficient income from contributions (based on the tax schedule and taxable earnings base now in the law) and from investments to meet the cost of benefit payments and administrative expenses both for the next 15 to 20 years and for the distant future.

APPENDICES

APPENDIX I. ASSUMPTIONS, METHODOLOGY, AND DETAILS OF LONG-RANGE COST ESTIMATES

The basic assumptions used in the long-range estimates for the old-age, survivors, and disability insurance system are described in this appendix.¹ Also given are more detailed data in connection with the results of these estimates.

Population

Projections were made of the U.S. population (including overseas areas covered by the old-age, survivors, and disability insurance program) for future quinquennial years, by 5-year age groups and by sex. The starting point was the population on July 1, 1965, as estimated by the Bureau of the Census from the 1960 census and from births, deaths, and migration in 1960-65. This population estimate was increased to allow for probable underenumeration in the 1960 census and adjusted for differences in the geographical areas covered by the estimate of the Bureau of the Census and those covered by the old-age, survivors, and disability insurance system.

In the projections for both cost estimates it is assumed that mortality rates will decline until the year 2000. In the high-cost estimates, mortality rates for the year 2000 are, on the average, about 73 percent of the 1959-61 level. The mortality is projected to decrease by about 40-55 percent at the younger ages, but with the rates at the older ages showing somewhat smaller improvements. The low-cost estimate assumes exactly half of the improvement in mortality used in the high-cost estimate.

In the low-cost estimate, fertility rates are assumed to decrease slowly until reaching a level in 1985 roughly equivalent to about 83 percent of the average rates prevailing in the period 1960-65. The high-cost fertility rates decrease more rapidly and reach an ultimate rate in 2010 equivalent to about 68 percent of the 1960-65 experience. Both estimates assume a small amount of net immigration.

The low-cost estimate is based on high fertility and high mortality, while the high-cost estimate assumes low fertility and low mortality. This makes the high-cost population relatively much older than the low-cost population, which is reasonable in view of the fact that benefits to aged persons account for more than 80 percent of the cost of the system. Complete details about the population projections are given in Actuarial Study No. 62, Social Security Administration.

Employment

Assumptions as to the percentage of the population who have covered employment during a year were made for each age group by sex for each quinquennial year. The estimated percentages for 1965 for males were projected to increase slightly (so as to reflect some decrease in the unemployment rate over that prevailing in 1965), except for the older ages where they were assumed to decrease for both the low-cost and high-cost assumptions (thus recognizing the possibility of higher retirement rates). An increase was assumed for females, except for the very old ages; these increases are higher in the middle ages and are a continuation of trends in the past.

The foregoing assumptions are consistent with the assumed 4-percent unemployment rate. A long depression could substantially increase the cost, but it is believed that any periods of low employment would be of short duration and would not have a significant long-range effect.

¹ A more detailed discussion of the procedures followed in making the long-range cost estimates will be published in Actuarial Study No. 64, Social Security Administration.

Earnings

Level average earnings at about the 1966 level were assumed for each sex. This assumption implies that within each sex group the earnings level would not rise on account of changes in the distribution of covered workers by occupation or industry.

In the past, average earnings have increased substantially, partly because of inflation, and partly because of increased productivity. If this trend continues and if the benefit formula is not changed, the cost relative to payroll would be less than the estimates show because the formula provides a benefit that is a decreasing percentage of average wage as the average wage increases.

It is likely, however, that if average earnings increase, the benefit formula and the earnings base used for contributions will be modified.

If benefit payments are increased in exactly the same ratio as the increase in average earnings, the year-by-year cost estimates of benefit payments expressed as a percentage of payroll would be unchanged. There would, however, be some increase in the level-cost because of the diminished relative value of interest earnings on the trust funds.

Insured population

The term "insured" is used as meaning fully insured, since the number of persons who are currently insured only is relatively small and can be disregarded for long-range cost analysis purposes. The percentages of insured persons by age and sex in various future years are estimated from the percentages of persons covered. It is evident that eventually almost all males in the country will be insured for old-age and survivor benefits; the ultimate percentage for aged males is estimated at 96 percent in the low-cost estimate and 98 percent in the high-cost estimates. For females there is much greater uncertainty; it is estimated that the corresponding proportions for aged females will eventually be 70 percent in the low-cost estimate and 75 percent in the high-cost estimate (the differential reflecting the range possible because of women moving in and out of the labor market and whether or not thereby they obtain insured status).

The estimated numbers of persons insured for disability benefits are lower than those insured for old-age and survivor benefits because of the more restrictive insured status provisions for disability benefits.

Aged beneficiaries

Old-age beneficiaries are estimated from the aged insured population. The proportions, by age and sex, of the insured population that were receiving benefits at the beginning of 1965 were projected to increase slightly in the high-cost estimate, following the trends in the past—thus, reflecting the assumed gradual increase in the retirement rates. In the low-cost estimate, the rates were assumed to remain at the 1965 level, which reflects the most recent tendency for a leveling-off in this factor.

Wives aged 62 and over of male old-age beneficiaries were estimated by using census data and mortality projections. These potential wife beneficiaries, after adjustment for eligibility to benefits on their own account, were assumed to claim benefits as soon as they are eligible, even if this occurred at ages 62 to 64, when they would have to take reduced benefits. The experience to date indicates that in the vast majority of the cases such immediate claiming of wife's benefits does occur.

To estimate widow beneficiaries the proportions of widows in the female aged population were projected according to mortality assumptions and adjusted for both eligibility to benefits on their own account and for the insured status of their deceased husbands. These uninsured eligible widows were assumed to claim benefits as soon as available even if this occurred at ages 60 and 61, when they would have to take reduced benefits. For ages 50 to 59 the disabled widow beneficiaries were estimated from the eligible widows by using disability prevalence rates.

It can be observed that the assumed wife and widow beneficiaries consist of the uninsured potential beneficiaries. In actual practice, some of the insured potential beneficiaries also receive a residual benefit consisting of the excess of the potential wife's or widow's benefit over their own old-age benefit. These residual benefits, although not giving rise to additional aged beneficiaries, were considered in the cost of the particular type of dependent or survivor benefit concerned.

The minor category of parent beneficiaries is estimated as a constant proportion of aged persons not eligible for any other benefit. The insignificant effect of the retirement test as it applies to wife's, widow's, and parent's benefits was ignored. No estimates were made for benefits to dependent husbands and widowers since their cost is relatively negligible.

Appendix table 1 shows the estimated numbers of aged beneficiaries.

APPENDIX TABLE 1.—MONTHLY RETIREMENT BENEFICIARIES IN CURRENT-PAYMENT STATUS, 1 1956-2000

¹ Persons qualifying both for old-age benefits and for wife's, widow's, husband's, widower's, and parent's benefits are shown only as old-age beneficiaries. Minimum retirement age was 65 until November 1956, when it was lowered to 62 for women, and until August 1961, when it was also reduced to 62 for men, except that for widows it was further lowered to 60 in September 1965. Actual data as of the end of the year (except for 1958—November); estimated data as of the middle of the year. Excluding effect of railroad financial interchange provisions.

² Including dependent husbands and including wives of any age with child beneficiaries in their care (both relatively small categories).

³ Including dependent widowers and disabled widows and widowers aged 50 and over.

Beneficiaries under retirement age

Young wives and children of retired workers were estimated by reference to their ratios to male old-age beneficiaries, as derived from recent actual data and projected according to the population fertility and mortality assumptions.

Child-survivor beneficiaries were obtained from estimates of total paternal orphans in the country in future years. The projected child population by age groups was multiplied by the probability of being a paternal orphan. These probabilities were derived by using distributions of age of fathers at birth of child and death rates consistent with the population projections. The number of paternal orphans was then adjusted to eliminate orphans of uninsured men, to add orphans of insured women and to include the eligible disabled orphans aged 18 and over. For the nondisabled children aged 18 to 21, a further reduction was made to exclude those not attending school. Mother survivor beneficiaries were estimated by assuming a constant ratio of mothers to children, after excluding maternal orphans and those aged 18 to 21 who are attending school. The numbers of lump-sum death payments were estimated by multiplying the insured population by death rates used in the population projections.

Disabled beneficiaries and their dependents

Future numbers of persons receiving monthly disability benefits based on their own earnings records are estimated by applying disability prevalence rates (by age and sex) to the population insured for disability benefits. Prevalence rates may be defined as the proportion of the relevant population (population insured for disability in this case) that has a specific characteristic (receiving disability benefits in this case).

The prevalence rates are based on current operating experience and the new definitions in the 1965 and 1967 amendments and are used to calculate the numbers of beneficiaries in the future. In accordance with current experience, the prevalence rates for females are assumed to be about 80 percent of those for male workers.

Appendix table 2 shows the estimates of number of beneficiaries under the minimum retirement age (including disability insurance beneficiaries and their dependents).

Average benefits and total benefit payments

Average benefits in the various benefit categories were interpolated between the sizes of current benefit awards, estimated from recent claims data, and the sizes of the ultimate benefits computed. The latter were determined as though the 1966 earnings level were in effect throughout the entire working life of all workers with respect to whom benefits are being paid. Total benefit payments are shown in dollar amounts, in tables 21 and 22, and as a percentage of payroll, in table 20.

¹ See footnote 1 of app. table 1 for definition of minimum retirement age. Does not include wives under age 62 of old-age beneficiaries; including disability beneficiaries aged 62 to 64 and spouses aged 62 and over of disability beneficiaries. For actual data, as of December (except for 1958, November); for estimated future data, as of middle of year. Excluding effect of railroad financial interchange provisions.

² Children of retired and deceased workers.

³ Spouses of disabled workers, including some such spouses aged 62 and over.

⁴ Children of disabled workers.

⁵ January through November 1958.

⁶ December 1958 through December 1959.

The combined cost of old-age, survivors, and disability benefits (expressed as a percentage of taxable payroll) in 1967 as shown in tables 16 and 19 is projected to increase by about 60 percent in the low-cost estimate and by about 120 percent in the high-cost estimate, according to table 20. The significant upward cost trend is temporarily reversed around the year 2000, at which time a significant part of the aged population consists of survivors of persons born in the 1930's, when birth rates were low.

Administrative expenses

Assumed administrative expenses for old-age, survivors, and disability insurance are based on two factors—the number of persons having any covered employment in the given year and the number of monthly beneficiaries.

Railroad retirement financial interchange

A financial interchange between the old-age, survivors, and disability insurance system and the railroad retirement system is provided, as explained in appendix II. The purpose of this interchange is to place the old-age and survivors insurance and the disability insurance trust funds in the same position they would have been in if railroad employment were, and always had been, covered employment.

Because of the relatively older age distribution of railroad workers, the transfer is currently in favor of the railroad retirement system. But it is estimated that eventually the low-cost factors in respect to railroad employment—higher average wage, lower percentage of females, and more wives and widows of railroad workers receiving old-age, survivors, and disability insurance benefits on their own earnings records, rather than on the record of the railroad worker—will shift the transfer the other way. The long-range effect is relatively insignificant insofar as old-age, survivors, and disability insurance costs are concerned, but the current estimates indicate a small "net gain" to the railroad retirement system over the entire period of these estimates.

Interest rate

The 1960 amendments revised the basis for determining the interest rate on public-debt obligations issued for purchase by the trust funds (special issues), which constitute a major portion of the investments of the trust funds. Under previous law, the interest rate on special obligations was related to the average coupon rate on all outstanding marketable obligations of the United States not due or callable for at least 5 years from the original issue date. Under present law, this interest rate is based on the average market yield of all such marketable obligations not due or callable for 4 or more years from the time of the issuance of the special obligations.

This change will have the immediate effect of gradually increasing the interest income of the trust funds as compared with the previous basis. The ultimate effect is expected to be only a slight increase in the interest income of the system since, over the long run, coupon rates on new long-term Government obligations tend to follow (both up and down) the average market yield on all outstanding long-term issues.

For the intermediate-cost estimate a level interest rate of 3.75 percent was assumed. This is somewhat below the average yield of the total investments of both trust funds as of January 1, 1968 (3.89 percent), and also is below the rate applicable for new investments in December 1967 (5% percent). The interest rate for the low-cost and high-cost estimates was assumed at 4.25 percent and 3.25 percent, respectively.

APPENDIX II. LEGISLATIVE HISTORY AFFECTING THE TRUST FUNDS¹

Board of trustees.—From January 1, 1940, when the Federal old-age and survivors insurance trust fund was established, through July 15, 1946, the three members of the board of trustees, who served in an ex officio capacity, were the

¹ Amendments to the Social Security Act and to related sections of the Internal Revenue Code were made during the period 1939–68. The more important changes made in 1950–58 that are significant from an actuarial standpoint are described in app. II of the 21st annual report of the board of trustees. The more important changes contained in the 1960 and 1961 amendments are described in the main body of the 23d annual report, the changes made in 1964 are described in the 25th annual report, and the more important changes contained in the amendments made in 1965 and in 1966 are described in the 1967 annual report. The more important changes contained in the 1967 amendments are described in the main body of the present report.

Secretary of the Treasury, the Secretary of Labor, and the Chairman of the Social Security Board. On July 16, 1946, under Reorganization Plan No. 2 of 1946, the Federal Security Administrator became ex officio member of the board of trustees in place of the Chairman of the Social Security Board, which agency was abolished.

On April 11, 1953, Reorganization Plan No. 1 of 1953, creating the Department of Health, Education, and Welfare, went into effect, and the office of Federal Security Administrator was abolished. The functions of the Administrator as ex officio member of the board of trustees were taken over by the Secretary of Health, Education, and Welfare. The remaining membership of the board has not changed since it was first established. Since the establishment of the fund, the Secretary of the Treasury has been managing trustee. The Social Security Act Amendments of 1950 designated the Commissioner for Social Security—since April 11, 1953, the Commissioner of Social Security—as Secretary of the board of trustees.

Under the Social Security Amendments of 1956, the functions of the board of trustees have related to both the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund. The Social Security Amendments of 1960 eliminated the so-called three-times rule (requiring the board of trustees to report to the Congress whenever it expects that in the course of the next 5 fiscal years either of the trust funds will exceed three times the highest annual expenditures from such fund anticipated during that 5-year period). The Social Security Amendments of 1965 provide that the board of trustees shall meet not less frequently than once each calendar year.

Contribution rates.—The Social Security Act of 1935 fixed the contribution rates for employees and their employers at 1 percent each on taxable wages for the calendar years 1937–39, and provided for higher rates thereafter. However, subsequent acts of Congress extended the 1-percent rates through calendar year 1949. On January 1, 1950, the rates rose to 1½-percent each for employees and employers, as provided by the Social Security Act Amendments of 1947. In accordance with the Social Security Act Amendments of 1950, the 1½-percent rates remained in effect through calendar year 1953 and, on January 1, 1954, rose to 2-percent each for employees and employers. These rates remained in effect through December 31, 1956.

In accordance with the Social Security Amendments of 1956, which provided for the creation of the Federal disability insurance trust fund, the 2-percent rates were increased to 2¼ percent each on January 1, 1957, in order to finance the new disability benefits under the expanded old-age, survivors, and disability insurance (OASDI) program. These rates remained in effect through calendar year 1958. On January 1, 1959, the rates rose to 2½ percent each, and on January 1, 1960, to 3 percent each, as provided by the Social Security Amendments of 1958. These rates remained in effect through December 31, 1961.

In accordance with the Social Security Amendments of 1961, the 3-percent rates rose, on January 1, 1962, to 3¼ percent each for employees and employers, and on January 1, 1963, to 3½ percent each. These rates remained in effect through December 31, 1965. In accordance with the Social Security Amendments of 1965, the rates rose to 3.85 percent each for employees and employers on January 1, 1966, and 3.9 percent each on January 1, 1967. Beginning on January 1, 1966, coverage was extended to include cash tips, taxable as wages, with only the employee's share of the tax contributions payable (the employer is exempted from payment of tax contributions on cash tips).

Beginning January 1, 1951—the effective date of extension of coverage to self-employed persons—the rates of tax on self-employment income have been equal to 1½ times the corresponding employee rates, except that beginning in 1962 the resulting rates for the self-employed are rounded to the nearest tenth of 1 percent.

The Social Security Act, as amended in 1956, provided that beginning January 1, 1957, from the total contribution income based on the foregoing rates, contributions at the rate of 0.25 percent each for employees and employers, and 0.375 percent for the self-employed, should be allocated to the disability insurance trust fund. Under the act as amended in 1965, this allocation for the disability insurance (DI) program increased to 0.35 percent each for employees and employers on January 1, 1966; for the self-employed, the allocation rate increased to 0.525 percent.

The tax rates that have been in effect since 1937, as well as the rates that have been allocated (after 1956) for payment of benefits from the disability insurance

trust funds, and the maximum amount of annual earnings to which the rates applied are shown in appendix table 3.

Special refunds of employee contributions.—With respect to wages paid before 1951, refunds to employees who worked for more than one employer during the course of a year and paid contributions on such wages in excess of the statutory maximum were made from the general fund of the Treasury. With respect to wages paid after 1950, these refunds are paid from the Treasury account for refunding internal revenue collections. The Social Security Act Amendments of 1950 directed the managing trustee to pay from time to time from the old-age and survivors insurance trust fund into the Treasury, as repayments to the account for refunding internal revenue collections, the amount of contributions which are subject to refund with respect to wages paid after 1950. The Social Security Amendments of 1956 provided for similar repayments from the disability insurance trust fund.

APPENDIX TABLE 3.—TAX CONTRIBUTION RATES AND MAXIMUM TAXABLE AMOUNT OF ANNUAL EARNINGS. CALENDAR YEARS 1937-67

Calendar years	Maximum taxable amount of annual earnings	Tax contribution rates (percent of taxable earnings)

¹ Included in total OASDI rate.

Credits for military service.—The Social Security Act Amendments of 1946 provided survivor-insurance protection to certain World War II veterans for a period of 3 years following their discharge from the Armed Forces. Federal appropriations were authorized to reimburse the old-age and survivors insurance trust fund for such sums as were withdrawn to meet the additional cost (including administrative expenses) of such payments.

The 1950 amendments, which provided noncontributory \$160 monthly wage credits to persons who served in the Armed Forces during World War II, and the 1952, 1953, 1955, and 1956 amendments, which provided similar noncontributory credits on account of active military or naval service from July 25, 1947, through December 31, 1956, charged to the old-age and survivors insurance trust fund not only the additional costs arising from these credits but also, beginning September 1950, those additional costs arising under the 1946 amendments.

The 1956 amendments provided contributory coverage for military personnel beginning January 1, 1957. In addition, these amendments authorized that the old-age and survivors insurance trust fund and, where appropriate, the disability insurance trust fund be reimbursed from the general fund of the Treasury for expenditures after August 1950, resulting from the provisions that granted noncontributory \$160 monthly wage credits to persons who served in the Armed Forces from September 16, 1940, through December 31, 1956, and from the provisions enacted in 1946.

The 1965 amendments provided a new basis of reimbursement to the trust funds from the general fund of the Treasury for the foregoing expenditures. Under the new basis, annual appropriations to the trust funds from the general fund of the Treasury are authorized, beginning with fiscal year 1966, that will amortize, over a 50-year period, both the accumulated backlog of expenditures resulting from such military service and the additional amounts that will accrue

through fiscal year 2015. After 2015, annual appropriations are authorized to meet the currently accruing additional costs of subsequent benefit payments. The existing statutory provisions that authorize the granting of noncontributory credits for military service and the financing of these credits are set forth in appendix III.

Payments to certain noninsured persons aged 72 and over.—Public Law 89-368, the Tax Adjustment Act of 1966, approved March 15, 1966, amended the Social Security Act to provide monthly payments, effective with benefits for October 1966, to certain noninsured persons aged 72 and over. Under the legislation, all payments are made initially from the old-age and survivors insurance trust fund. Provision is made for reimbursement from the general fund of the Treasury to the trust fund in each fiscal year, beginning in fiscal year 1969, on account of payments during the second preceding fiscal year to persons with less than 3 quarters of coverage. The reimbursement also includes the additional administrative expenses resulting from such payments and the loss of interest resulting from such payments and expenses. The statutory provisions authorizing payments to noninsured persons aged 72 and over and the financing of these payments are set forth in appendix III.

Coordination of old-age, survivors, and disability insurance and railroad retirement programs.—Public Law 234, approved October 30, 1951, amended the Railroad Retirement Act to provide a basis for coordinating the railroad retirement program with old-age and survivors insurance. This legislation provides that the railroad wage credits of workers who die or retire with less than 10 years of railroad employment shall be transferred to the old-age and survivors insurance system. These amendments did not affect workers who acquire 10 years or more of railroad service. That is, the survivors of over-10-year railroad workers will, as under the 1946 amendments to the Railroad Retirement Act, receive benefits under one program or the other based on combined wage records, while retirement benefits will be payable under both systems to individuals with 10 or more years of railroad service who also qualify under old-age and survivors insurance.

With respect to the allocation of costs between the two systems, Public Law 234 required the Railroad Retirement Board and the Secretary of Health, Education, and Welfare to—

“determine, no later than January 1, 1954, the amount which would place the Federal old-age and survivors insurance trust fund in the same position in which it would have been at the close of the fiscal year ending June 30, 1952, if service as an employee after December 31, 1936, had been included in the term ‘employment’ as defined in the Social Security Act and in the Federal Insurance Contributions Act.”

The two agencies completed a series of joint actuarial studies and analyses required by this provision. The results show that the addition of \$488 million to the old-age and survivors insurance trust fund would place it in the same position as of June 30, 1952, as it would have been if railroad employment had always been covered under the Social Security Act.

There is no authority in the law that would have permitted the transfer of the \$488 million from the railroad retirement account to the trust fund, but the legislation provides that beginning with fiscal year 1953, and for each fiscal year thereafter, annual interest payments on this amount were to be transferred from the railroad retirement account to the trust fund.

The legislation further provides that at the close of the fiscal year 1953, and each fiscal year thereafter, annual reimbursements are to be effected between the railroad retirement account and the trust fund in such amounts as would, taking into consideration the amount determined for the period through June 30, 1952, place the trust fund at the end of the year in the same position in which it would have been if railroad employment were covered under the Social Security Act. If the reimbursement is from the trust fund to the railroad retirement account, the Secretary of Health, Education, and Welfare may offset the amount of such reimbursement against the amount determined for the period through June 30, 1952.

The Social Security Amendments of 1956 amended Public Law 234 to provide for similar annual determinations and financial interchanges between the railroad retirement account and the newly created disability insurance trust fund, beginning with the fiscal year ending June 30, 1958.

Payments for costs of vocational rehabilitation services.—The Social Security Amendments of 1965 provided for payments from the old-age and survivors insurance and disability insurance trust funds for the cost of vocational rehabili-

tation services furnished to disability insurance beneficiaries and to disabled adults receiving benefits on the basis of disabilities that have continued since childhood. The total amount of funds that may be made available for purposes of reimbursement for such services may not, in any fiscal year, exceed 1 percent of the benefits certified for payment to these types of beneficiaries in the preceding year. The statutory provisions authorizing payments from the trust funds for the cost of vocational rehabilitation services are set forth in appendix III.

Investments.—Since the inception of the program, provision has been made for the investment of funds which are not required to meet current disbursements. As provided in the Social Security Act, the funds may be invested only in interest-bearing obligations of the U.S. Government or in obligations guaranteed as to both principal and interest by the United States; or the funds may be invested in certain federally-sponsored agency obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States. These obligations may be acquired on original issue at the issue price or by purchase of outstanding obligations at their market price. In addition, the Social Security Act authorizes the issuance of public-debt obligations for purchase by the trust funds. (These public-debt obligations, issued for purchase by the trust have been referred to in the law in the past as special obligations; more popularly they are referred to as special issues.)

The Social Security Act of 1935 specified that special issues should bear interest at the rate of 3 percent per annum, and that other obligations could be acquired only on such terms as to provide an investment yield of at least 3 percent per annum. The Social Security Act Amendments of 1939 provided that the special issues should bear interest at a rate equal to the average rate of interest, computed as of the end of the calendar month next preceding the date of their issue, borne by all interest-bearing obligations of the United States forming a part of the public debt, such average rate being rounded down to the next lower one-eighth of 1 percent. The 1939 amendments also eliminated the requirement that obligations other than special obligations could be acquired only on such terms as to provide an investment yield of at least 3 percent per annum.

In recognition of the long-term character of the commitments of the trust funds, the Social Security Amendments of 1956 provided that the special issues should have maturities fixed with due regard for the needs of the funds, and that they should bear interest at a rate equal to the average rate of interest borne by all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable for 5 or more years from the date of original issue, such average rate being rounded to the nearest one-eighth of 1 percent. For several years preceding the enactment of the 1956 amendments, the special issues had a maximum duration from issue to maturity of 1 year. As a result of the provisions of the 1956 amendments described above, the maximum duration to maturity of the special issues was lengthened to 15 years.

The Social Security Amendments of 1960 provided that special issues acquired after enactment should bear interest at a rate equal to the average market yield (computed on the basis of market quotations as of the end of the calendar month next preceding their issue) on all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable for 4 or more years from the time the special obligations are issued, such average market yield being rounded to the nearest one-eighth of 1 percent.

APPENDIX III.—SELECTED STATUTORY PROVISIONS RELATING TO THE TRUST FUNDS, AS OF JANUARY 2, 1968

(Sec. 201, sec. 217, sec. 218(e) (1), (h), and (j), sec. 222(d), sec. 228, sec. 229, and sec. 706 of the Social Security Act as amended)

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND AND FEDERAL DISABILITY INSURANCE TRUST FUND

SEC. 201. (a) There is hereby created on the books of the Treasury of the United States a trust fund to be known as the "Federal Old-Age and Survivors Insurance Trust Fund". The Federal Old-Age and Survivors Insurance Trust Fund shall consist of the securities held by the Secretary of the Treasury for the Old-Age Reserve Account and the amount standing to the credit of the Old-

tation services furnished to disability insurance beneficiaries and to disabled adults receiving benefits on the basis of disabilities that have continued since childhood. The total amount of funds that may be made available for purposes of reimbursement for such services may not, in any fiscal year, exceed 1 percent of the benefits certified for payment to these types of beneficiaries in the preceding year. The statutory provisions authorizing payments from the trust funds for the cost of vocational rehabilitation services are set forth in appendix III.

Investments.—Since the inception of the program, provision has been made for the investment of funds which are not required to meet current disbursements. As provided in the Social Security Act, the funds may be invested only in interest-bearing obligations of the U.S. Government or in obligations guaranteed as to both principal and interest by the United States; or the funds may be invested in certain federally-sponsored agency obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States. These obligations may be acquired on original issue at the issue price or by purchase of outstanding obligations at their market price. In addition, the Social Security Act authorizes the issuance of public-debt obligations for purchase by the trust funds. (These public-debt obligations, issued for purchase by the trust have been referred to in the law in the past as special obligations; more popularly they are referred to as special issues.)

The Social Security Act of 1935 specified that special issues should bear interest at the rate of 3 percent per annum, and that other obligations could be acquired only on such terms as to provide an investment yield of at least 3 percent per annum. The Social Security Act Amendments of 1939 provided that the special issues should bear interest at a rate equal to the average rate of interest, computed as of the end of the calendar month next preceding the date of their issue, borne by all interest-bearing obligations of the United States forming a part of the public debt, such average rate being rounded down to the next lower one-eighth of 1 percent. The 1939 amendments also eliminated the requirement that obligations other than special obligations could be acquired only on such terms as to provide an investment yield of at least 3 percent per annum.

In recognition of the long-term character of the commitments of the trust funds, the Social Security Amendments of 1956 provided that the special issues should have maturities fixed with due regard for the needs of the funds, and that they should bear interest at a rate equal to the average rate of interest borne by all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable for 5 or more years from the date of original issue, such average rate being rounded to the nearest one-eighth of 1 percent. For several years preceding the enactment of the 1956 amendments, the special issues had a maximum duration from issue to maturity of 1 year. As a result of the provisions of the 1956 amendments described above, the maximum duration to maturity of the special issues was lengthened to 15 years.

The Social Security Amendments of 1960 provided that special issues acquired after enactment should bear interest at a rate equal to the average market yield (computed on the basis of market quotations as of the end of the calendar month next preceding their issue) on all marketable interest-bearing obligations of the United States forming a part of the public debt which are not due or callable for 4 or more years from the time the special obligations are issued, such average market yield being rounded to the nearest one-eighth of 1 percent.

APPENDIX III.—SELECTED STATUTORY PROVISIONS RELATING TO THE TRUST FUNDS, AS OF JANUARY 2, 1968

(Sec. 201, sec. 217, sec. 218(e) (1), (h), and (j), sec. 222(d), sec. 228, sec. 229, and sec. 706 of the Social Security Act as amended)

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND AND FEDERAL DISABILITY INSURANCE TRUST FUND

SEC. 201. (a) There is hereby created on the books of the Treasury of the United States a trust fund to be known as the "Federal Old-Age and Survivors Insurance Trust Fund". The Federal Old-Age and Survivors Insurance Trust Fund shall consist of the securities held by the Secretary of the Treasury for the Old-Age Reserve Account and the amount standing to the credit of the Old-

Age Reserve Account on the books of the Treasury on January 1, 1940, which securities and amount the Secretary of the Treasury is authorized and directed to transfer to the Federal Old-Age and Survivors Insurance Trust Fund, and, in addition, such amounts as may be appropriated to, or deposited in, the Federal Old-Age and Survivors Insurance Trust Fund as hereinafter provided. There is hereby appropriated to the Federal Old-Age and Survivors Insurance Trust Fund for the fiscal year ending June 30, 1941, and for each fiscal year thereafter, out of any moneys in the Treasury not otherwise appropriated, amounts equivalent to 100 per centum of—

(1) the taxes (including interest, penalties, and additions to the taxes) received under subchapter A of chapter 9 of the Internal Revenue Code of 1939 (and covered into the Treasury) which are deposited into the Treasury by collectors of internal revenue before January 1, 1951; and

(2) the taxes certified each month by the Commissioner of Internal Revenue as taxes received under subchapter A of chapter 9 of such Code which are deposited into the Treasury by collectors of internal revenue after December 31, 1950, and before January 1, 1953, with respect to assessments of such taxes made before January 1, 1951; and

(3) the taxes imposed by subchapter A of chapter 9 of such Code with respect to wages (as defined in section 1426 of such Code), and by chapter 21 (other than sections 3101(b) and 3111(b)) of the Internal Revenue Code of 1954 with respect to wages (as defined in section 3121 of such Code) reported to the Commissioner of Internal Revenue pursuant to section 1420(c) of the Internal Revenue Code of 1939 after December 31, 1950, or to the Secretary of the Treasury or his delegates pursuant to subtitle F of the Internal Revenue Code of 1954 after December 31, 1954, as determined by the Secretary of the Treasury by applying the applicable rates of tax under such subchapter or chapter 21 (other than sections 3101(b) and 3111(b)) to such wages, which wages shall be certified by the Secretary of Health, Education, and Welfare on the basis of the records of wages established and maintained by such Secretary in accordance with such reports, less the amounts specified in clause (1) of subsection (b) of this section; and

(4) the taxes imposed by subchapter E of chapter 1 of the Internal Revenue Code of 1939, with respect to self-employment income (as defined in section 481 of such Code), and by chapter 2 (other than section 1401(b)) of the Internal Revenue Code of 1954 with respect to self-employment income (as defined in section 1402 of such Code) reported to the Commissioner of Internal Revenue on tax returns under such subchapter or to the Secretary of the Treasury, or his delegate on tax returns under subtitle F of such Code, as determined by the Secretary of the Treasury by applying the applicable rate of tax under such subchapter or chapter (other than section 1401(b)) to such self-employment income, which self-employment income shall be certified by the Secretary of Health, Education, and Welfare on the basis of the records of self-employment income established and maintained by the Secretary of Health, Education, and Welfare in accordance with such returns, less the amounts specified in clause (2) of subsection (b) of this section.

The amounts appropriated by clauses (3) and (4) shall be transferred from time to time from the general fund in the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund, and the amounts appropriated by clauses (1) and (2) of subsection (b) shall be transferred from time to time from the general fund in the Treasury to the Federal Disability Insurance Trust Fund, such amounts to be determined on the basis of estimates by the Secretary of the Treasury of the taxes, specified in clauses (3) and (4) of this subsection, paid to or deposited into the Treasury; and proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or were less than the taxes specified in such clauses (3) and (4) of this subsection.

(b) There is hereby created on the books of the Treasury of the United States a trust fund to be known as the "Federal Disability Insurance Trust Fund". The Federal Disability Insurance Trust Fund shall consist of such amounts as may be appropriated to, or deposited in, such fund as provided in this section. There is hereby appropriated to the Federal Disability Insurance Trust Fund for the fiscal year ending June 30, 1957, and for each fiscal year thereafter, out of any moneys in the Treasury not otherwise appropriated, amounts equivalent to 100 per centum of—

(1) (A) $\frac{1}{2}$ of 1 per centum of the wages (as defined in section 3121 of the Internal Revenue Code of 1954) paid after December 31, 1956, and before January 1, 1966, and reported to the Secretary of the Treasury or his delegate pursuant to subtitle F of the Internal Revenue Code of 1954, (B) 0.70 of 1 per centum of the wages (as so defined) paid after December 31, 1965, and before January 1, 1968, and so reported, and (C) 0.95 of 1 per centum of the wages (as so defined) paid after December 31, 1967, and so reported, which wages shall be certified by the Secretary of Health, Education, and Welfare on the basis of the records of wages established and maintained by such Secretary in accordance with such reports; and

(2) (A) $\frac{3}{8}$ of 1 per centum of the amount of self-employment income (as defined in section 1402 of the Internal Revenue Code of 1954) reported to the Secretary of the Treasury or his delegate on tax returns under subtitle F of the Internal Revenue Code of 1954 for any taxable year beginning after December 31, 1956, and before January 1, 1966, (B) and 0.525 of 1 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1965, and before January 1, 1968, and (C) 0.7125 of 1 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1967, which self-employment income shall be certified by the Secretary of Health, Education, and Welfare on the basis of the records of self-employment income established and maintained by the Secretary of Health, Education, and Welfare in accordance with such returns.

(c) With respect to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund (hereinafter in this title called the "Trust Funds") there is hereby created a body to be known as the Board of Trustees of the Trust Funds (hereinafter in this title called the "Board of Trustees") which Board of Trustees shall be composed of the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health, Education, and Welfare, all ex officio. The Secretary of the Treasury shall be the Managing Trustee of the Board of Trustees (hereinafter in this title called the "Managing Trustee"). The Commissioner of Social Security shall serve as Secretary of the Board of Trustees. The Board of Trustees shall meet not less frequently than once each calendar year. It shall be the duty of the Board of Trustees to—

- (1) Hold the Trust Funds;
- (2) Report to the Congress not later than the first day of April of each year on the operation and status of the Trust Funds during the preceding fiscal year and on their expected operation and status during the next ensuing five fiscal years;
- (3) Report immediately to the Congress whenever the Board of Trustees is of the opinion that the amount of either of the Trust Funds is unduly small;
- (4) Recommend improvements in administrative procedures and policies designed to effectuate the proper coordination of the old-age and survivors insurance and Federal-State unemployment compensation program; and
- (5) Review the general policies followed in managing the Trust Funds, and recommend changes in such policies, including necessary changes in the provisions of the law which govern the way in which the Trust Funds are to be managed.

The report provided for in paragraph (2) above shall include a statement of the assets of, and the disbursements made from, the Trust Funds during the preceding fiscal year, an estimate of the expected future income to, and disbursements to be made from, the Trust Funds during each of the next ensuing five fiscal years, and a statement of the actuarial status of the Trust Funds. Such report shall also include an actuarial analysis of the benefit disbursements made from the Federal Old-Age and Survivors Insurance Trust Fund with respect to disabled beneficiaries. Such report shall be printed as a House document of the session of the Congress to which the report is made.

(d) It shall be the duty of the Managing Trustee to invest such portion of the Trust Funds as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose such obligations may be acquired (1) on original issue at the issue price, or (2) by purchase of outstanding obligations at the market price. The purposes for which obligations of the United States may be issued under the Second Liberty Bond Act, as amended, are hereby extended to authorize the issuance at par of public-debt obligations for purchase by the

Trust Funds. Such obligations issued for purchase by the Trust Funds shall have maturities fixed with due regard for the needs of the Trust Funds and shall bear interest at a rate equal to the average market yield (computed by the Managing Trustee on the basis of market quotations as of the end of the calendar month next preceding the date of such issue) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of four years from the end of such calendar month; except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest of such obligations shall be the multiple of one-eighth of 1 per centum nearest such market yield. The Managing Trustee may purchase other interest-bearing obligations of the United States or obligations guaranteed as to both principal and interest by the United States, on original issue or at the market price, only where he determines that the purchase of such other obligations is in the public interest.

(e) Any obligations acquired by the Trust Funds (except public-debt obligations issued exclusively to the Trust Funds) may be sold by the Managing Trustee at the market price, and such public-debt obligations may be redeemed at par plus accrued interest.

(f) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund shall be credited to and form a part of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, respectively.

(g) (1) (A) There are authorized to be made available for expenditure, out of any or all of the Trust Funds (which for purposes of this paragraph shall include also the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund established by title XVIII), such amounts as the Congress may deem appropriate to pay the costs of the part of the administration of this title and title XVIII for which the Secretary of Health, Education, and Welfare is responsible. During each fiscal year or after the close of such fiscal year (or at both times), the Secretary of Health, Education, and Welfare shall analyze the costs of administration of this title and title XVIII during the appropriate part or all of such fiscal year in order to determine the portion of such costs which should be borne by each of the Trust Funds and shall certify to the Managing Trustee the amount, if any, which should be transferred among such Trust Funds in order to assure that each of the Trust Funds bears its proper share of the costs incurred during such fiscal year for the part of the administration of this title and title XVIII for which the Secretary of Health, Education, and Welfare is responsible. The Managing Trustee is authorized and directed to transfer any such amount (determined under the preceding sentence) among such Trust Funds in accordance with any certification so made.

(B) The Managing Trustee is directed to pay from the Trust Funds into the Treasury the amounts estimated by him which will be expended, out of moneys appropriated from the general funds in the Treasury, during each calendar quarter by the Treasury Department for the part of the administration of this title and title XVIII for which the Treasury Department is responsible and for the administration of chapters 2 and 21 of the Internal Revenue Code of 1954. Such payments shall be covered into the Treasury as repayment to the account for reimbursement of expenses incurred in connection with such administration of this title and title XVIII and chapters 2 and 21 of the Internal Revenue Code of 1954.

(2) The Managing Trustee is directed to pay from time to time from the Trust Funds into the Treasury the amount estimated by him as taxes imposed under section 3101(a) which are subject to refund under section 6413(c) of the Internal Revenue Code of 1954 with respect to wages (as defined in section 1426 of the Internal Revenue Code of 1939 and section 3121 of the Internal Revenue Code of 1954) paid after December 31, 1950. Such taxes shall be determined on the basis of the records of wages established and maintained by the Secretary of Health, Education, and Welfare in accordance with the wages reported to the Commissioner of Internal Revenue pursuant to section 1420(c) of the Internal Revenue Code of 1939 and to the Secretary of the Treasury or his delegate pursuant to subtitle F of the Internal Revenue Code of 1954, and the Secretary shall furnish the Managing Trustee such information as may be required by the Trustee for such purpose. The payments by the Managing Trustee shall be covered into the Treasury as repayments to the account for refunding internal revenue collections. Payments pursuant to the first sentence of this paragraph shall be made

from the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund in the ratio in which amounts were appropriated to such Trust Funds under clause (3) of subsection (a) of this section and clause (1) of subsection (b) of this section.

(3) Repayments made under paragraph (1) or (2) shall not be available for expenditures but shall be carried to the surplus fund of the Treasury. If it subsequently appears that the estimates under either such paragraph in any particular period were too high or too low, appropriate adjustments shall be made by the Managing Trustee in future payments.

(h) Benefit payments required to be made under section 223, and benefit payments required to be made under subsection (b), (c), or (d) of section 202 to individuals entitled to benefits on the basis of the wages and self-employment income of an individual entitled to disability insurance benefits, shall be made only from the Federal Disability Insurance Trust Fund. All other benefit payments required to be made under this title (other than section 226) shall be made only from the Federal Old-Age and Survivors Insurance Trust Fund.

BENEFITS IN CASE OF VETERANS

SEC. 217. (a) (1) For purposes of determining entitlement to and the amount of any monthly benefit for any month after August 1950, or entitlement to and the amount of any lump-sum death payment in case of a death after such month, payable under this title on the basis of the wages and self-employment income of any World War II veteran, and for purposes of section 216(i) (3), such veteran shall be deemed to have been paid wages (in addition to the wages, if any, actually paid to him) of \$160 in each month during any part of which he served in the active military or naval service of the United States during World War II. This subsection shall not be applicable in the case of any monthly benefit or lump-sum death payment if—

(A) a larger such benefit or payment, as the case may be, would be payable without its application; or

(B) a benefit (other than a benefit payable in a lump sum unless it is a commutation of, or a substitute for, periodic payments) which is based, in whole or in part, upon the active military or naval service of such veteran during World War II is determined by any agency or wholly owned instrumentality of the United States (other than the Veterans' Administration) to be payable by it under any other law of the United States or under a system established by such agency or instrumentality. The provisions of clause (B) shall not apply in the case of any monthly benefit or lump-sum death payment under this title if its application would reduce by \$0.50 or less the primary insurance amount (as computed under section 215 prior to any recomputation thereof pursuant to subsection (f) of such section) of the individual on whose wages and self-employment income such benefit or payment is based. The provisions of clause (B) shall also not apply for purposes of section 216(i) (3).

(2) Upon application for benefits or a lump-sum death payment on the basis of the wages and self-employment income of any World War II veteran, the Secretary of Health, Education, and Welfare shall make a decision without regard to clause (B) of paragraph (1) of this subsection unless he has been notified by some other agency or instrumentality of the United States that, on the basis of the military or naval service of such veteran during World War II, a benefit described in clause (B) of paragraph (1) has been determined by such agency or instrumentality to be payable by it. If he has not been so notified, the Secretary of Health, Education, and Welfare shall then ascertain whether some other agency or wholly owned instrumentality of the United States has decided that a benefit described in clause (B) of paragraph (1) is payable by it. If any such agency or instrumentality has decided, or thereafter decides, that such a benefit is payable by it, it shall so notify the Secretary of Health, Education, and Welfare, and the Secretary shall certify no further benefits for payment or shall recompute the amount of any further benefits payable, as may be required by paragraph (1) of this subsection.

(3) Any agency or wholly owned instrumentality of the United States which is authorized by any law of the United States to pay benefits, or has a system of benefits which are based, in whole or in part, on military or naval service during World War II shall, at the request of the Secretary of Health, Education, and Welfare, certify to him, with respect to any veteran, such information

as the Secretary deems necessary to carry out his functions under paragraph (2) of this subsection.

(b) (1) Any World War II veteran who died during the period of three years immediately following his separation from the active military or naval service of the United States shall be deemed to have died a fully insured individual whose primary insurance amount is the amount determined under section 215(c). Notwithstanding section 215(d), the primary insurance benefit (for purposes of section 215(c)) of such veteran shall be determined as provided in this title as in effect prior to the enactment of this section, except that the 1 per centum addition provided for in section 209(e)(2) of this Act as in effect prior to the enactment of this section shall be applicable only with respect to calendar years prior to 1951. This subsection shall not be applicable in the case of any monthly benefit or lump-sum death payment if—

(A) a larger such benefit or payment, as the case may be, would be payable without its application;

(B) any pension or compensation is determined by the Veterans' Administration to be payable by it on the basis of the death of such veteran;

(C) the death of the veteran occurred while he was in the active military or naval service of the United States; or

(D) such veteran has been discharged or released from the active military or naval service of the United States subsequent to July 26, 1951.

(2) Upon an application for benefits or a lump-sum death payment on the basis of the wages and self-employment income of any World War II veteran, the Secretary of Health, Education, and Welfare shall make a decision without regard to paragraph (1)(B) of this subsection unless he has been notified by the Veterans' Administration that pension or compensation is determined to be payable by the Veterans' Administration by reason of the death of such veteran. The Secretary of Health, Education, and Welfare shall thereupon report such decision to the Veterans' Administration. If the Veterans' Administration in any such case has made an adjudication or thereafter makes an adjudication that any pension or compensation is payable under any law administered by it, it shall notify the Secretary of Health, Education, and Welfare, and the Secretary shall certify no further benefits for payment, or shall recompute the amount of any further benefits payable, as may be required by paragraph (1) of this subsection to any individual, not exceeding the amount of any accrued pension or compensation payable to him by the Veterans' Administration, shall (notwithstanding the provisions of section 3101 of title 38, United States Code) be deemed to have been paid to him by such Administration on account of such accrued pension or compensation. No such payment certified by the Secretary of Health, Education, and Welfare, and no payment certified by him for any month prior to the first month for which any pension or compensation is paid by the Veterans' Administration shall be deemed by reason of this subsection to have been an erroneous payment.

(c) In the case of any World War II veteran to whom subsection (a) is applicable, proof of support required under section 202(h) may be filed by a parent at any period prior to July 1951 or prior to the expiration of two years after the date of the death of such veteran, whichever is the later.

(d) For the purposes of this section—

(1) The term "World War II" means the period beginning with September 16, 1940, and ending at the close of July 24, 1947.

(2) The term "World War II veteran" means any individual who served in the active military or naval service of the United States at any time during World War II and who, if discharged or released therefrom, was so discharged or released under conditions other than dishonorable after active service of ninety days or more or by reason of a disability or injury incurred or aggravated in service in line of duty; but such term shall not include any individual who died while in the active military or naval service of the United States if his death was inflicted (other than by an enemy of the United States) as lawful punishment for a military or naval offense.

(e) (1) For purposes of determining entitlement to and the amount of any monthly benefit or lump-sum death payment payable under this title on the basis of the wages and self-employment income of any veteran (as defined in paragraph (4)), and for purposes of section 216(i)(3), such veteran shall be deemed to have been paid wages (in addition to the wages, if any, actually paid to him) of \$160 in each month during any part of which he served in the active military or naval service of the United States on or after July 25, 1947, and prior to

January 1, 1957. This subsection shall not be applicable in the case of any monthly benefit or lump-sum death payment if—

(A) a larger such benefit or payment, as the case may be, would be payable without its application; or

(B) a benefit (other than a benefit payable in a lump sum unless it is a commutation of, or a substitute for, periodic payments) which is based, in whole or in part, upon the active military or naval service of such veteran on or after July 25, 1947, and prior to January 1, 1957, is determined by any agency or wholly owned instrumentality of the United States (other than the Veterans' Administration) to be payable by it under any other law of the United States or under a system established by such agency or instrumentality.

The provisions of clause (B) shall not apply in the case of any monthly benefit or lump-sum death payment under this title if its application would reduce by \$0.50 or less the primary insurance amount (as computed under section 215 prior to any recomputation thereof pursuant to subsection (f) of such section) of the individual on whose wages and self-employment income such benefit or payment is based. The provisions of clause (B) shall also not apply for purposes of section 216(i) (3). In the case of monthly benefits under this title for months after December 1956 (and any lump-sum death payment under this title with respect to a death occurring after December 1956) based on the wages and self-employment income of a veteran who performed service (as a member of a uniformed service) to which the provisions of section 210(1)(1) are applicable, wages which would, but for the provisions of clause (B), be deemed under this subsection to have been paid to such veteran with respect to his active military or naval service performed after December 1950 shall be deemed to have been paid to him with respect to such service notwithstanding the provisions of such clause, but only if the benefits referred to in such clause which are based (in whole or in part) on such service are payable solely by the Army, Navy, Air Force, Marine Corps, Coast Guard, Coast and Geodetic Survey or Public Health Service.

(2) Upon application for benefits or a lump-sum death payment on the basis of the wages and self-employment income of any veteran, the Secretary of Health, Education, and Welfare shall make a decision without regard to clause (B) of paragraph (1) of this subsection unless he has been notified by some other agency or instrumentality of the United States that, on the basis of the military or naval service of such veteran on or after July 25, 1947, and prior to January 1, 1957, a benefit described in clause (B) of paragraph (1) has been determined by such agency or instrumentality to be payable by it. If he has not been so notified, the Secretary of Health, Education, and Welfare shall then ascertain whether some other agency or wholly owned instrumentality of the United States has decided that a benefit described in clause (B) of paragraph (1) is payable by it. If any such agency or instrumentality has decided, or thereafter decides, that such a benefit is payable by it, it shall so notify the Secretary of Health, Education, and Welfare, and the Secretary shall certify no further benefits for payment or shall recompute the amount of any further benefits payable, as may be required by paragraph (1) of this subsection.

(3) Any agency or wholly owned instrumentality of the United States which is authorized by any law of the United States to pay benefits, or has a system of benefits which are based, in whole or in part, on military or naval service on or after July 25, 1947, and prior to January 1, 1957, shall, at the request of the Secretary of Health, Education, and Welfare, certify to him, with respect to any veteran, such information as the Secretary deems necessary to carry out his functions under paragraph (2) of this subsection.

(4) For the purposes of this subsection, the term "veteran" means any individual who served in the active military or naval service of the United States at any time on or after July 25, 1947, and prior to January 1, 1957, and who, if discharged or released therefrom, was so discharged or released under conditions other than dishonorable after active service of ninety days or more or by reason of a disability or injury incurred or aggravated in service in line of duty; but such term shall not include any individual who died while in the active military or naval service of the United States if his death was inflicted (other than by an enemy of the United States) as lawful punishment for a military or naval offense.

(f) (1) In any case where a World War II veteran (as defined in subsection (d) (2)) or a veteran (as defined in subsection (e) (4)) has died or shall here-

after die, and his widow or child is entitled under subchapter III of chapter 83 of title 5, United States Code, * an annuity in the computation of which his active military or naval service was included, clause (B) of subsection (a) (1) or clause (B) of subsection (e) (1) shall not operate (solely by reason of such annuity) to make such subsection inapplicable in the case of any monthly benefit under section 202 which is based on his wages and self-employment income; except that no such widow or child shall be entitled under section 202 to any monthly benefit in the computation of which such service is included by reason of this subsection (A) unless such widow or child after December 1956 waives his or her right to receive such annuity, or (B) for any month prior to the first month with respect to which the Civil Service Commission certifies to the Secretary of Health, Education, and Welfare that (by reason of such waiver) no further annuity will be paid to such widow or child under such subchapter III on the basis of such veteran's military or civilian service. Any such waiver shall be irrevocable.

(2) Whenever a widow waives her right to receive such annuity such waiver shall constitute a waiver on her own behalf; a waiver by a legal guardian or guardians, or, in the absence of a legal guardian, the person (or persons) who has the child in his care, of the child's right to receive such annuity shall constitute a waiver on behalf of such child. Such a waiver with respect to an annuity based on a veteran's service shall be valid only if the widow and all children, or, if there is no widow, all the children, waive their rights to receive annuities under subchapter III of chapter 83 of title 5, United States Code, based on such veteran's military or civilian service.

(g) (1) In September 1965, and in every fifth September thereafter up to and including September 2010, the Secretary shall determine the amount which, if paid in equal installments at the beginning of each fiscal year in the period beginning—

(A) with the July 1, 1965, in the case of the first such determination, and

(B) with the July 1 following the determination in the case of all other such determinations,

and ending with the close of June 30, 2015, would accumulate, with interest compounded annually, to an amount equal to the amount needed to place each of the Trust Funds and the Federal Hospital Insurance Trust Fund in the same position at the close of June 30, 2015, as he estimates they would otherwise be in at the close of that date if section 210 of this act as in effect prior to the Social Security Act Amendments of 1950, and this section, had not been enacted. The rate of interest to be used in determining such amount shall be the rate determined under section 201(d) for public-debt obligations which were or could have been issued for purchase by the Trust Funds in the June preceding the September in which such determination is made.

(2) There are authorized to be appropriated to the Trust Funds and the Federal Hospital Insurance Trust Fund—

(A) for the fiscal year ending June 30, 1966, an amount equal to the amount determined under paragraph (1) in September 1965, and

(B) for each fiscal year in the period beginning with July 1, 1966, and ending with the close of June 30, 2015, an amount equal to the annual installment for such fiscal year under the most recent determination under paragraph (1) which precedes such fiscal year.

(3) For the fiscal year ending June 30, 2016, there is authorized to be appropriated to the Trust Funds and the Federal Hospital Insurance Trust Fund such sums as the Secretary determines would place the Trust Funds and the Federal Hospital Insurance Trust Fund in the same position in which they would have been at the close of June 30, 2015, if section 210 of this Act as in effect prior to the Social Security Act Amendments of 1950, and this section, had not been enacted.

(4) There are authorized to be appropriated to the Trust Funds and the Federal Hospital Insurance Trust Fund annually, as benefits under this title and part A of title XVIII are paid after June 30, 2015, such sums as the Secretary determines to be necessary to meet the additional costs, resulting from subsections (a), (b), and (e), of such benefits (including lump-sum death payments).

Gratuitous Wage Credits for American Citizens Who Served in the Armed Forces of Allied Countries

(h) (1) For the purposes of this section, any individual who the Secretary finds—

(A) served during World War II (as defined in subsection (d) (1)) in the active military or naval service of a country which was on September 16, 1940, at war with a country with which the United States was at war during World War II;

(B) entered into such active service on or before December 8, 1941;

(C) was a citizen of the United States throughout such period of service or lost his United States citizenship solely because of his entrance into such service;

(D) had resided in the United States for a period or periods aggregating four years during the five-year period ending on the day of, and was domiciled in the United States on the day of, such entrance into such active service; and

(E) (i) was discharged or released from such service under conditions other than dishonorable after active service of ninety days of more or by reason of a disability or injury incurred or aggravated in service in line of duty, or

(ii) died while in such service,

shall be considered a World War II veteran (as defined in subsection (d) (2)) and such service shall be considered to have been performed in the active military or naval service of the United States.

(2) In the case of any individual to whom paragraph (1) applies, proof of support required under section 202(f) or (h) may be filed at any time prior to the expiration of two years after the date of such individual's death or the date of the enactment of this subsection, whichever is the later.

PAYMENTS AND REPORTS BY STATES

SEC. 218. (e) (1) Each agreement under this section shall provide—

(A) that the State will pay to the Secretary of the Treasury, at such time or times as the Secretary of Health, Education, and Welfare may by regulations prescribe, amounts equivalent to the sum of the taxes which would be imposed by sections 3101 and 3111 of the Internal Revenue Code of 1954 if the services of employees covered by the agreement constituted employment as defined in section 3121 of such Code; and

(B) that the State will comply with such regulations relating to payments and reports as the Secretary of Health, Education, and Welfare may prescribe to carry out the purposes of this section.

DEPOSITS IN TRUST FUND; ADJUSTMENTS

SEC. 218. (h) (1) All amounts received by the Secretary of the Treasury under an agreement made pursuant to this section shall be deposited in the Trust Funds and the Federal Hospital Insurance Trust Fund in the ratio in which amounts are appropriated to such Funds pursuant to subsection (a) (3) of section 201, subsection (b) (1) of such section, and subsection (a) (1) of section 1817, respectively.

(2) If more or less than the correct amount due under an agreement made pursuant to this section is paid with respect to any payment of remuneration, proper adjustments with respect to the amounts due under such agreement shall be made, without interest, in such manner and at such times as may be prescribed by regulations of the Secretary of Health, Education, and Welfare.

(3) If an overpayment cannot be adjusted under paragraph (2), the amount thereof and the time or times it is to be paid shall be certified by the Secretary of Health, Education, and Welfare to the Managing Trustee, and the Managing Trustee, through the Fiscal Service of the Treasury Department and prior to any action thereon by the General Accounting Office, shall make payment in accordance with such certification. The Managing Trustee shall not be held personally liable for any payment or payments made in accordance with a certification by the Secretary of Health, Education, and Welfare.

FAILURE TO MAKE PAYMENTS

Sec. 218. (j) In case any State does not make, at the time or times due, the payments provided for under an agreement pursuant to this section, there shall be added, as part of the amounts due, interest at the rate of 6 per centum per annum from the date due until paid, and the Secretary of Health, Education, and Welfare may, in his discretion deduct such amounts plus interest from any amounts certified by him to the Secretary of the Treasury for payment to such State under any other provision of this Act. Amounts so deducted shall be deemed to have been paid to the State under such other provision of this Act. Amounts equal to the amounts deducted under this subsection are hereby appropriated to the Trust Funds in the ratio in which amounts are deposited in such Funds pursuant to subsection (h) (1).

COSTS OF REHABILITATION SERVICES FROM TRUST FUNDS

Sec. 222. (d) (1) For the purpose of making vocational rehabilitation services more readily available to disabled individuals who are—

- (A) entitled to disability insurance benefits under section 223, or
- (B) entitled to child's insurance benefits under section 202(d) after having attained age 18 (and are under a disability), or
- (C) entitled to widow's insurance benefits under section 202(e) prior to attaining age 60, or

(D) entitled to widower's insurance benefits under section 202(f) prior to attaining age 62, to the end that savings will result to the Trust Funds as a result of rehabilitating the maximum number of such individuals into productive activity, there are authorized to be transferred from the Trust Funds such sums as may be necessary to enable the Secretary to pay the costs of vocational rehabilitation services for such individuals (including (i) services during their waiting periods, and (ii) so much of the expenditures for the administration of any State plan as is attributable to carrying out this subsection); except that the total amount so made available pursuant to this subsection in any fiscal year may not exceed 1 percent of the total of the benefits under section 202(d) for children who have attained age 18 and are under a disability, the benefits under section 202(e) for widows and surviving divorced wives who have not attained age 60 and are under a disability, the benefits under section 202(f) for widowers who have not attained age 62, and the benefits under section 223, which were certified for payment in the preceding year. The selection of individuals (including the order in which they shall be selected) to receive such services shall be made in accordance with criteria formulated by the Secretary which are based upon the effect the provision of such services would have upon the Trust Funds.

(2) In the case of each State which is willing to do so, such vocational rehabilitation services shall be furnished under a State plan for vocational rehabilitation services which—

(A) has been approved under section 5 of the Vocational Rehabilitation Act,

(B) provides that, to the extent funds provided under this subsection are adequate for the purpose, such services will be furnished, to any individual in the State who meets the criteria prescribed by the Secretary pursuant to paragraph (1), with reasonable promptness and in accordance with the order of selection determined under such criteria, and

(C) provides that such services will be furnished to any individual without regard to (i) his citizenship or place of residence, (ii) his need for financial assistance except as provided in regulations of the Secretary in the case of maintenance during rehabilitation, or (iii) any order of selection which would otherwise be followed under the State plan pursuant to section 5(a) (4) of the Vocational Rehabilitation Act.

(3) In the case of any State which does not have a plan which meets the requirements of paragraph (2), the Secretary may provide such services by agreement or contract with other public or private agencies, organizations, institutions, or individuals.

(4) Payments under this subsection may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

(5) Money paid from the Trust Funds under this subsection to pay the costs of providing services to individuals who are entitled to benefits under section 223 (including services during their waiting periods), or who are entitled to benefits under section 202(d) on the basis of the wages and self-employment income of such individuals shall be charged to the Federal Disability Insurance Trust Fund, and all other money paid out from the Trust Funds under this subsection shall be charged to the Federal Old-Age and Survivors Insurance Trust Fund. The Secretary shall determine according to such methods and procedures as he may deem appropriate—

(A) the total cost of the services provided under this subsection, and

(B) subject to the provisions of the preceding sentence, the amount of such cost which should be charged to each of such Trust Funds.

(6) For the purposes of this subsection the term "vocational rehabilitation services" shall have the meaning assigned to it in the Vocational Rehabilitation Act, except that such services may be limited in type, scope, or amount in accordance with regulations of the Secretary designed to achieve the purposes of this subsection.

BENEFIT AT AGE 72 FOR CERTAIN UNINSURED INDIVIDUALS

ELIGIBILITY

SEC. 228. (a) Every individual who—

(1) has attained the age of 72,

(2) (A) attained such age before 1968, or (B) has not less than 3 quarters of coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attained such age,

(3) is a resident of the United States (as defined in subsection (e)), and is (A) a citizen of the United States or (B) an alien lawfully admitted for permanent residence who has resided in the United States (as defined in section 210(i)) continuously during the 5 years immediately preceding the month in which he files application under this section, and

(4) has filed application for benefits under this section, shall (subject to the limitations in this section) be entitled to a benefit under this section for each month beginning with the first month after September 1966 in which he becomes so entitled to such benefits and ending with the month preceding the month in which he dies. No application under this section which is filed by an individual more than 3 months before the first month in which he meets the requirements of paragraphs (1), (2), and (3) shall be accepted as an application for purposes of this section.

Benefit Amount

(b) (1) Except as provided in paragraph (2), the benefit amount to which an individual is entitled under this section for any month shall be \$40.

(2) If both husband and wife are entitled (or upon application would be entitled) to benefits under this section for any month, the amount of the husband's benefit for such month shall be \$40 and the amount of the wife's benefit for such month shall be \$20.

Reduction for Governmental Pension System Benefits

(c) (1) The benefit amount of any individual under this section for any month shall be reduced (but not below zero) by the amount of any periodic benefit under a governmental pension system for which he is eligible for such month.

(2) In the case of a husband and wife only one of whom is entitled to benefits under this section for any month, the benefit amount, after any reduction under paragraph (1), shall be further reduced (but not below zero) by the excess (if any) of (A) the total amount of any periodic benefits under governmental pension systems for which the spouse who is not entitled to benefits under this section is eligible for such month, over (B) \$20.

(3) In the case of a husband and wife both of whom are entitled to benefits under this section for any month—

(A) the benefit amount of the wife, after any reduction under paragraph (1), shall be further reduced (but not below zero) by the excess (if any) of (i) the total amount of any periodic benefits under governmental pension systems for which the husband is eligible for such month, over (ii) \$40, and

(B) the benefit amount of the husband, after any reduction under paragraph (1), shall be further reduced (but not below zero) by the excess (if any) of (i) the total amount of any periodic benefits under governmental pension systems for which the wife is eligible for such month, over (ii) \$20.

(4) For purposes of this subsection, in determining whether an individual is eligible for periodic benefits under a governmental pension system—

(A) such individual shall be deemed to have filed application for such benefits,

(B) to the extent that entitlement depends on an application by such individual's spouse, such spouse shall be deemed to have filed application, and

(C) to the extent that entitlement depends on such individual or his spouse having retired, such individual and his spouse shall be deemed to have retired before the month for which the determination of eligibility is being made.

(5) For purposes of this subsection, if any periodic benefit is payable on any basis other than a calendar month, the Secretary shall allocate the amount of such benefit to the appropriate calendar months.

(6) If, under the foregoing provisions of this section, the amount payable for any month would be less than \$1, such amount shall be reduced to zero. In the case of a husband and wife both of whom are entitled to benefits under this section for the month, the preceding sentence shall be applied with respect to the aggregate amount so payable for such month.

(7) If any benefit amount computed under the foregoing provisions of this section is not a multiple of \$0.10, it shall be raised to the next higher multiple of \$0.10.

(8) Under regulations prescribed by the Secretary, benefit payments under this section to an individual (or aggregate benefit payments under this section in the case of a husband and wife) of less than \$5 may be accumulated until they equal or exceed \$5.

Suspension for Months in Which Cash Payments Are Made Under Public Assistance

(d) The benefit to which any individual is entitled under this section for any month shall not be paid for such month if—

(1) such individual receives aid or assistance in the form of money payments in such month under a State plan approved under title I, X, XIV, or XVI, or part A of title IV, or

(2) such individual's husband or wife receives such aid or assistance in such month, and under the State plan the needs of such individual were taken into account in determining eligibility for (or amount of) such aid or assistance,

unless the State agency administering or supervising the administration of such plan notifies the Secretary, at such time and in such manner as may be prescribed in accordance with regulations of the Secretary, that such payments to such individual (or such individual's husband or wife) under such plan are being terminated with the payment or payments made in such month.

Suspension Where Individual Is Residing Outside the United States

(e) The benefit to which any individual is entitled under this section for any month shall not be paid if, during such month, such individual is not a resident of the United States. For purposes of this subsection, the term "United States" means the 50 States and the District of Columbia.

Treatment as Monthly Insurance Benefits

(f) For purposes of subsections (t) and (u) of section 202, and of section 1840, a monthly benefit under this section shall be treated as a monthly insurance benefit payable under section 202.

Annual Reimbursement of Federal Old-Age and Survivors Insurance Trust Fund

(g) There are authorized to be appropriated to the Federal Old-Age and Survivors Insurance Trust Fund for the fiscal year ending June 30, 1969, and for each fiscal year thereafter, such sums as the Secretary of Health, Education, and Welfare deems necessary on account of—

(1) payments made under this section during the second preceding fiscal year and all fiscal years prior thereto to individuals who, as of the beginning of the calendar year in which falls the month for which payment was made, had less than 3 quarters of coverage,

(2) the additional administrative expenses resulting from the payments described in paragraph (1), and

(3) any loss in interest to such Trust Fund resulting from such payments and expenses,

in order to place such Trust Fund in the same position at the end of such fiscal year as it would have been in if such payments had not been made.

Definitions

(h) For purposes of this section—

(1) The term "quarter of coverage" includes a quarter of coverage as defined in section 5(1) of the Railroad Retirement Act of 1937.

(2) The term "governmental pension system" means the insurance system established by this title or any other system or fund established by the United States, a State, any political subdivision of a State, or any wholly owned instrumentality of any one or more of the foregoing which provides for payment of (A) pensions, (B) retirement or retired pay, or (C) annuities or similar amounts payable on account of personal services performed by any individual (not including any payment under any workmen's compensation law or any payment by the Veterans' Administration as compensation for service-connected disability or death).

(3) The term "periodic benefit" includes a benefit payable in a lump sum if it is a commutation of, or a substitute for, periodic payments.

(4) The determination of whether an individual is a husband or wife for any month shall be made under subsection (h) of section 216 without regard to subsections (b) and (f) of section 216.

BENEFITS IN CASE OF MEMBERS OF THE UNIFORMED SERVICES

SEC. 229. (a) For purposes of determining entitlement to and the amount of any monthly benefit for any month after December 1967, or entitlement to and the amount of any lump-sum death payment in case of a death after such month, payable under this title on the basis of the wages and self-employment income of any individual, and for purposes of section 216(i)(3), such individual shall be deemed to have been paid, in each calendar quarter occurring after 1967 in which he was paid wages for service as a member of a uniformed service (as defined in section 210(m)) which was included in the term "employment" as defined in section 210(a) as a result of the provisions of section 210(1), wages (in addition to the wages actually paid to him for such service) of—

(1) \$100 if the wages actually paid to him in such quarter for such services were \$100 or less,

(2) \$200 if the wages actually paid to him in such quarter for such services were more than \$100 but not more than \$200, or

(3) \$300 in any other case.

(b) There are authorized to be appropriated to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, and the Federal Hospital Insurance Trust Fund annually, as benefits under this title and part A of title XVIII are paid after December 1967, such sums as the Secretary determines to be necessary to meet (1) the additional costs, resulting from subsection (a), of such benefits (including lump-sum death payments), (2) the additional administrative expenses resulting therefrom, and (3) any loss in interest to such trust funds resulting from the payment of such amounts. Such additional costs shall be determined after any increases in such benefits arising from the application of section 217 have been made.

ADVISORY COUNCIL ON SOCIAL SECURITY

SEC. 706. (a) During 1969 (but not before February 1, 1969) and every fourth year thereafter (but not before February 1 of such fourth year), the Secretary shall appoint an Advisory Council on Social Security for the purpose of reviewing the status of the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust

Fund, and the Federal Supplementary Medical Insurance Trust Fund in relation to the long-term commitments of the old-age, survivors, and disability insurance program and the programs under parts A and B of title XVIII, and of reviewing the scope of coverage and the adequacy of benefits under, and all other aspects of, these programs, including their impact on the public assistance programs under this Act.

(b) Each such Council shall consist of a Chairman and 12 other persons, appointed by the Secretary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service. The appointed members shall, to the extent possible, represent organizations of employers and employees in equal numbers, and represent self-employed persons and the public.

(c) (1) Any Council appointed hereunder is authorized to engage such technical assistance, including actuarial services, as may be required to carry out its functions, and the Secretary shall, in addition, make available to such Council such secretarial, clerical, and other assistance and such actuarial and other pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out such functions.

(2) Appointed members of any such Council, while serving on business of the Council (inclusive of travel time), shall receive compensation at rates fixed by the Secretary, but not exceeding \$100 per day and, while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government employed intermittently.

(d) Each such Council shall submit reports (including any interim reports such Council may have issued) of its findings and recommendations to the Secretary not later than January 1 of the second year after the year in which it is appointed, and such reports and recommendations shall thereupon be transmitted to the Congress and to the Board of Trustees of each of the Trust Funds. The reports required by this subsection shall include—

(1) a separate report with respect to the old-age, survivors, and disability insurance program under title II and of the taxes imposed under sections 1401 (a), 3101 (a), and 3111 (a) of the Internal Revenue Code of 1954,

(2) a separate report with respect to the hospital insurance program under part A of title XVIII and of the taxes imposed by sections 1401 (b), 3101 (b), and 3111 (b) of the Internal Revenue Code of 1954, and

(3) a separate report with respect to the supplementary medical insurance program established by part B of title XVIII and of the financing thereof.

After the date of the transmittal to the Congress of the reports required by this subsection, the Council shall cease to exist.
