August 2011 OMB Scorecard on **Sustainability/Energy**

Scope 1&2 GHG Emission Reduction Target

For Scope 1&2 GHG Reduction Target of 21.2% by 2020: 6.2% reduction in 2010 and on track

00010.

Scope 3 GHG Emission Reduction Target

For Scope 3 GHG Reduction Target of 13% by 2020: 10.6% **increase** in 2010 and behind schedule

Score: YELLOW

Reduction in Energy Intensity

Reduction in energy intensity in goal-subject facilities compared with 2003: 5.6% and not on track

Score: RED

Use of Renewable Energy

Use of renewable energy as a percent of facility electricity use: 5.6% from any renewable source (including non-electric)

Score: YELLOW

Reduction in Potable Water Intensity

Reduction in potable water intensity compared with 2007: 7.4% **increase** and not on track

Score: RED

Reduction in Fleet Petroleum Use

Reduction in fleet petroleum use compared to 2005: 34.7% and on track for 20% by 2015

Score: GREEN

Green Buildings

Not applicable

Score: N/A

Standards for Success — Red Standard, Yellow Standard, Green Standard

Scope 1&2 GHG Emission Reduction Target

GREEN: Achieved its 2010 Sustainability Plan proposed reduction for GHG Scopes 1&2 and is on track to achieve its 2020 target.

YELLOW: Achieved at least half of its Sustainability Plan proposed target in FY 2010 for GHG Scopes 1&2.

RED: Did not achieve at least half of its Sustainability Plan proposed target in FY 2010 for GHG Scopes 1&2.

Scope 3 GHG Emission Reduction Target

GREEN: Achieved its 2010 Sustainability Plan proposed reduction for GHG Scope 3 and is on track to achieve its 2020 target.

YELLOW: Did not achieve its Sustainability Plan proposed reduction for 2010 GHG Scope 3 but developed base year and 2010 Scope 3 inventory.

RED: Did not develop a base year or 2010 GHG inventory for Scope 3 or provide planned target for FY 2020.

Reduction in Energy Intensity

GREEN: Reduced energy intensity (Btu/GSF*) in EISA goal-subject facilities by at least 15 percent compared with 2003 and is on track for 30 percent reduction by 2015.

YELLOW: Reduced energy intensity (Btu/GSF) in EISA goal-subject facilities by at least 12 percent compared with 2003.

RED: Did not reduce energy intensity (Btu/GSF) in EISA goal-subject facilities by at least 12 percent compared with 2003.

Use of Renewable Energy

GREEN: Uses at least 5 percent electricity from renewable sources as a percentage of facility electricity use & at least 2.5 percent of facility electricity use comes from new sources (post-1999). (Thermal and mechanical renewable can be included in the 2.5 percent new requirement, but not the 5 percent goal; i.e., an agency meets all new sources requirement with thermal or mechanical energy (2.5 percent) but would still need an additional 5 percent from renewable electricity sources.)

YELLOW: Uses at least 5 percent renewable energy from electric, thermal or mechanical sources to power facilities and equipment; but less than half was obtained from new sources (post-1999) or part of the requirement was met with thermal and mechanical renewable energy.

RED: Did not use at least 5 percent renewable energy from electric, thermal or mechanical sources to power facilities and equipment.

Reduction in Potable Water Intensity

GREEN: Reduced water intensity by at least 6 percent from final approved 2007 baseline and is on track for 26 percent reduction by 2020.

YELLOW: Reduced water intensity by at least 4 percent from final approved 2007 baseline.

RED: Did not reduce water intensity by at least 4 percent from final approved 2007 baseline.

Reduction in Fleet Petroleum Use

GREEN: Achieved a 10 percent reduction in petroleum use in its entire vehicle fleet compared to 2005 and is on track for 20 percent reduction by 2015.

YELLOW: Achieved at least 8 percent reduction in petroleum use in the entire vehicle fleet compared to 2005.

RED: Did not achieve at least 8 percent reduction in petroleum use in its entire vehicle fleet since 2005.

Green Buildings

GREEN: Demonstrates implementation of Guiding Principles for Federal Leadership in High Performance and Sustainable Buildings (GP) for new, existing and leased buildings; and is on track to meet 15% goal by 2015 by reporting that at least 5% of buildings >5,000 GSF meet GP as reported in the Federal Real Property Profile (FRPP).

YELLOW: Incorporates Guiding Principles into all new design contracts for construction, major renovations and leases and at least 5 percent of GSF of its building inventory over 5,000 GSF meets GP as reported in FRPP.

RED: Cannot demonstrate compliance with GP on new construction, major renovations, or leases; and/or less than 5 percent of building inventory, either by number of buildings or GSF, over 5,000 GSF meets GP as reported in FRPP.
