

Program Data

Social Security

The Social Security program—Old-Age, Survivors, and Disability Insurance (OASDI)—provides monthly benefits to workers and their families when the worker retires, dies, or becomes disabled. The amount of the worker's retirement insurance (old-age) or disability benefit is based on the worker's level of earnings in employment or self-employment covered by the Social Security program. Monthly benefits are payable to retired workers at age 62 (with reduced benefits) or to disabled workers at any age. The benefit amount for an auxiliary or survivor beneficiary is based on a percentage of the worker's benefit. Auxiliary and survivor beneficiaries must generally meet an age, disability, or child care requirement.

As of January 2006, the maximum monthly federal SSI payment for an individual living in his or her own household and with no other countable income is \$603, and for a couple, \$904.
