[^1]address.
${ }^{4}$ About 60 beneficiaries receiving less than $\$ 40$ are included in the figures on which the percentages are based.
S A bout 900 beneficiaries receiving more than $\$ 123$ are included in the figures on which the percentages are based.
show the average monthly benefits being paid, as well as the percentage distribution of the beneficiaries by size of benefit.

The number of disabled-worker beneficiaries at the end of 1962 was greater by 123,000 ( 20 percent) than in December 1961 ; the average monthly benefit ( $\$ 89.99$ ) was 40 cents higher than the average a year earlier. The higher average resulted chiefly from the steadily rising proportion
of benefits computed on the basis of earnings after 1950-83 percent at the end of 1962,80 percent at the end of 1961 , and 62 percent in Decem ber 1957.

The number of old-age (retired-worker) beneficiaries increased by 814,000 ( 9 percent) in 1962. The average old-age benefit amount went up each month during 1962 except November (when it dropped 1 cent), from $\$ 75.65$ in December 1961 to

[^2][^3]$\$ 76.19$ in December 1962. The large number of

-actuuarially reduced benefits awarded to men aged -64 tended to hold down the amount of the average benefit. A factor in the 54 -cent increase for the year was the greater proportion of benefits based on earnings after 1950--74 percent in December 1962 in comparison with 72 percent in December 1961 and 58 percent at the end of 1957. Another factor was the rise in the proportion of beneficiaries whose benefits were computed under the provisions that permit as many as 5 years of lowest earnings and periods of disability to be excluded in calculating the average monthly wage. These beneficiaries made up 78 percent of the total at the end of 1962,74 percent at the end of 1961, and 49 percent in December 1957. The increase from $\$ 4,200$ to $\$ 4,800$ in the maximum amount of ammal earnings creditable for years after 1958 contributed slightly to the higher average amount for both old-age and disability benefits.

As shown in table 1, 38 percent of all disabledworker beneficiaries were receiving monthly benefits of $\$ 100.00-\$ 123.00$ at the end of 1962 . Benefits in the $\$ 70.00-\$ 09.90$ range were going to 44 percent of the total, and benefits of $\$ 40.10-\$ 69.90$ to 16 percent. Minimum benefits of $\$ 40.00$ were Ting paid to about $11 / 2$ percent of the disabledsrker beneficiaries.
For 27 percent of the old-age beneficiaries the monthly benefit was $\$ 100.00-\$ 125.00$, for 29 percent it was in the $\$ 70.00-\$ 99.90$ range, and for 27 percent it was $\$ 40.10-\$ 69.90$. About 12 percent of the old-age beneticiaries were receiving monthly benefits of exactly $\$ 40.00$; for 5 percent the benefit was in the $\$ 32.00-\$ 39.90$ range because of actuarial reduction for retirement before age 65 .

As in past years, beneficiaries living in Michigan were receiving the highest disability benefits -an a verage of $\$ 98.20$-and those living in Connecticut the lighest old-age benefits- $\$ 85.02$. Beneficiaries living in Mississippi were receiving the lowest benefits, on the average- $\$ 78.48$ for disability and $\$ 57.59$ for old-age. Most of the States retained approximately the same relative position in the ranking by size of average benefit that they had held a year earlier.

Benefits of $\$ 100.00-\$ 123.00$ were being paid to 57 percent of the disabled-worker beneficiaries in Michigan and to 20 percent of those in Mississippi. Only 9 percent of Michigan's beneficiaries were receiving less than $\$ 70.00$, but for 34 percent
of the beneficiaries living in Mississippi the amount of the disability benefit was $\$ 40.00-\$ 69.90$. About 37 percent of the old-age beneficiaries in Connecticut and 8 percent of those in Mississippi were receiving benefits of $\$ 100.00-\$ 125.00$. Benefits of less than $\$ 70.00$ were going to only 30 percent of Comnecticut's old-age beneficiaries but to 74 percent of those in Mississippi.
