Highlights

Social Security

- In 2023, 182.7 million workers had earnings taxable under the Social Security program. About 160.9 million had only wages, 12.4 million had only self-employment income, and 9.4 million had both.
- Social Security taxable earnings totaled $9.839 trillion, which includes earnings up to the taxable maximum of $160,200.
- Social Security taxes totaled about $1,220 billion.

Medicare

- In 2023, 186.6 million workers had earnings taxable under the Medicare program. About 163.7 million had only wages, 12.2 million had only self-employment income, and 10.8 million had both.
- Medicare taxable earnings totaled $12.111 trillion.
- Medicare taxes totaled about $351 billion.

Preface

This report presents 2023 earnings and employment statistics by state and county for persons covered under the Social Security and Medicare programs.

The statistics, shown by sex and age, include the number of wage and salary workers and self-employed persons, the amount of their taxable earnings, and the amount they paid in Social Security and Medicare contributions. The information in this publication is a rich data source for researchers and policymakers who are interested in studying the primary revenue source for the Social Security (Old-Age, Survivors, and Disability Insurance) and the Medicare Part A (Hospital Insurance) programs. When coupled with the Social Security Administration publication *OASDI Beneficiaries by State and County,* these statistics are valuable for studying the impact of the Social Security program and are used for this purpose in academia, private industry, and state governments.

Your suggestions and comments on this report are welcome and should be directed to statistics@ssa.gov. This and other statistical reports on the Social Security and Supplemental Security Income programs are available at https://www.ssa.gov/policy.

Introduction

The Federal Insurance and Self-Employment Contribution Acts (FICA and SECA) require the withholding of taxes from wages of employed persons and the net earnings of most self-employed persons for the Social Security and Medicare programs. In 2023, earnings up to $160,200 in covered employment were subject to Social Security (Old-Age, Survivors, and Disability Insurance, OASDI) taxes. There was no limit on annual earnings subject to Medicare Part A (Hospital Insurance, HI) taxes.

Under Social Security, the tax rate was the same (6.2 percent) for both employees and employers. The rate for self-employed workers equaled the combined employee and employer rate of 12.4 percent. Under Medicare, the rate was also the same (1.45 percent) for both employees and employers. For self-employed workers, it was 2.9 percent.

Beginning in 2013, an additional Medicare tax of 0.9 percent is assessed on earned income exceeding $200,000 for individuals and $250,000 for married couples filing jointly. This additional Medicare tax is not included in the contribution amounts shown in the tables.

The amount of Social Security taxable earnings is determined first by counting wage and salary earnings (as reported by employers) and then any self-employment income up to the taxable maximum (as reported by self-employed individuals). The amount of taxes includes both the employee and employer shares for Social Security.

Statistics in this report are not adjusted for multiemployer tax refunds. Employees pay taxes on their earnings up to the annual maximum taxable amount for each employer that they work for during the year. Employees who work for two or more employers and earn more than the annual maximum taxable amount over the course of the year pay excess contributions that are later refunded. Corresponding employer contributions are not refunded.

Two deduction provisions reduce the SECA and income tax liability of self-employed persons, with the intent of treating them the same as employees and employers for purposes of Social Security and income taxes. Taxable net earnings from self-employment are determined by reducing net profit from self-employment by an amount equal to net profit times one-half of the combined SECA tax rate. The resulting amount is not taxable for Social Security if less than $400. In addition, self-employed persons may deduct one-half of their SECA taxes as an adjustment to income on Internal Revenue Service (IRS) Form 1040.

This report presents 2023 earnings and employment statistics for persons covered under Social Security and Medicare in the 50 states, the District of Columbia, and Puerto Rico. It shows members of the armed forces and reserves according to the residence listed on their W-2 form. Workers in American Samoa, Guam, Northern Mariana Islands, and U.S. Virgin Islands; U.S. citizens employed abroad by U.S. employers; persons employed on U.S. oceanborne vessels; and workers with unknown residence are grouped together as “Other.” The statistics are presented by sex and age.

The report uses a residence-based geographic coding system. State and county designations are based on employee residence shown on the W-2 wage reports that employers send to the Social Security Administration (SSA) and on addresses matched to self-employment earnings reports. Where a county code is not available, the residence is shown as “Unknown” within the state.

Maryland, Missouri, Nevada, and Virginia contain at least one independent city that is not part of a county. For these states, the counties are listed in alphabetical order, followed by the independent cities in alphabetical order.

The tables show workers with earnings reported in more than one state or county during the year in one location, mainly their end-of-year residence. The logic sequence for coding a worker’s residence begins with the address associated with self-employment. If the worker files no Schedule SE, the address from the report showing the highest taxable wages paid under Medicare is used. Workers with earnings reported in both wage and salary jobs and self-employment are counted in each type of employment, but only once in the total.

Data for this report were obtained from the 1 percent Continuous Work History Sample (CWHS), derived from W-2 wage reports and from IRS Schedule SE of Form 1040. The sample data were inflated to correspond to SSA estimates for the U.S. population. Totals and subtotals may differ slightly from the sum of component values because of rounding. For some counties, different weighting factors result in small discrepancies between the estimated number of workers in Social Security employment and the number in Medicare employment. All employment covered by Social Security is also covered by Medicare.

Because this report is based on a 1 percent sample, the data are subject to sampling variability. Each number is actually an estimate of the true value in the overall population. A result of sampling is that the numbers have

a level of uncertainty, and this uncertainty increases as the numbers get smaller. Therefore, the user should view numbers shown here, particularly the relatively smaller ones, with that result in mind. Sampling variability is described in the appendix. Certain values were suppressed to avoid disclosure of information about particular individuals. State totals include all county numbers, regardless of whether individual county numbers are suppressed.

Medicare money amounts for a given state or county can be distorted by high earners in our sample whose earnings are not statistically representative of that state or county.

All tables show the number of persons with taxable earnings under the Social Security and Medicare programs, the amount taxable, and the amount paid (FICA and SECA taxes).

The statistics for the OASDI program (Tables 1–3) exclude the earnings of persons in jobs covered by Medicare only, such as government employees hired after March 1986 under state and local retirement plans and federal employees hired before 1983 under the Civil Service Retirement System. However, their earnings from any part-time employment or self-employment under Social Security are counted.

The statistics for the HI program (Tables 4–6) include earnings over the Social Security taxable maximum and any earnings in jobs covered by Medicare only (such as government employment described above).

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

d. Includes persons employed in American Samoa, Guam, Northern Mariana Islands, and U.S. Virgin Islands; U.S. citizens employed abroad by U.S. employers; persons employed on U.S. oceanborne vessels; and workers with unknown residence.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTES: State designation is based on employee residence.

OASDI = Old-Age, Survivors, and Disability Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. Based on Social Security annual maximum taxable earnings of $160,200 in 2023.

b. Includes both employee and employer contributions. Data are not adjusted for tax refunds to persons who made excess contributions because they worked for two or more employers.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

NOTES: State designation is based on employee residence.

HI = Hospital Insurance; (X) = suppressed to avoid disclosing information about particular individuals.

a. There is no annual maximum taxable amount for Medicare earnings.

b. Includes both employee and employer contributions.

c. Workers with earnings from both wage and salary employment and self-employment are counted in each type of employment but only once in the total.

Sampling Variability

The tables in this document present statistics that are from a 1 percent sample file drawn from the administrative records of the Social Security Administration.

Because of sampling variability, estimates based on sample data may differ from the figures that would have been obtained if all of the records, rather than specified samples, had been used. The standard error is a measure of sampling variability. About 68 percent of all possible probability samples selected with the same specifications will give estimates within one standard error of the figure obtained from the compilation of all records. Similarly, approximately 90 percent will give estimates within 1.645 standard errors, about 95 percent will give estimates within two standard errors, and about 99 percent will give estimates within 2.5 standard errors. The standard error of an estimate depends on the design elements, such as the method of sampling, sample size, and the estimation process.

Because of the large number of data cells tabulated from the sample files, it is not practical to calculate the standard error for every possible cell. However, standard errors for a large number of cells were estimated and used to fit regression curves to provide approximate standard errors, tabulated counts, and proportions.

The tables that follow provide a general order of magnitude of standard errors for similar estimates from the various sample files. Table A-1 presents approximate standard errors for the estimated number of persons from the 1 percent sample file. The reliability of an estimated percentage depends on the size of the percentage and on the size of the total on which the percentage is based. Table A-2 provides approximations of the standard errors of the estimated percentage of persons in the 1 percent sample file.
