

Social Security Administration
Selected Product and Service Codes (PSC) for
Planned Analysis of Fiscal Year (FY) 2012 Inventory

The Social Security Administration has selected the following PSCs from its FY 2012 Service Contract Inventory for analysis as required by Office of Management and Budget memorandum entitled Service Contract Inventories, dated December 19, 2011.

Product and Service Code	Dollars Obligated in FY 2012
Q509 Medical – Internal Medicine	\$780,399
Q526 Medical – Medical/Psychiatric Consultation	\$43,131,285
R414 Systems Engineering Services	\$4,811,794
M174 Operation of Government Storage Facility	\$948,366

We selected the PSCs for analysis based on the criteria below:

- We considered PSCs within the agency’s top ten by dollars obligated.
- We considered generic types of PSCs because these codes are often used for functions not typically contracted for by the government.
- We considered PSCs that included management support service contracts as part of the effort to reduce the amount of these types of contracts.
- We eliminated from consideration PSCs previously analyzed.
- We considered PSCs that included contracts that were considered closely associated with inherently governmental functions.
